REGISTRATIONS

A. DOE Office of Science (SC) Portfolio Analysis and Management System (PAMS)

The Department of Energy (DOE) Office of Science (SC) performs many functions for DOE national laboratory proposals in the Portfolio Analysis and Management System (PAMS), which is available at https://pamspublic.science.energy.gov.

You must register in PAMS to submit a pre-proposal, letter of intent, or DOE national laboratory proposal.

To access PAMS, you may use the Internet Explorer, Firefox, Google Chrome, or Safari browsers.

Notifications sent from the PAMS system will come from the PAMS email address <PAMS.Autoreply@science.doe.gov>. Please make sure your email server/software allows delivery of emails from the PAMS email address to yours.

Registering to PAMS is a two-step process; once you create an individual account, you must associate yourself with (“register to”) your institution. Detailed steps are listed below.

1. CREATE PAMS ACCOUNT:

To register, click the “Create New PAMS Account” link on the website https://pamspublic.science.energy.gov/.

- Click the “No, I have never had an account” link and then the “Create Account” button.
- You will be prompted to enter your name and email address, create a username and password, and select a security question and answer. Once you have done this, click the “Save and Continue” button.
- On the next page, enter the required information (at least one phone number and your mailing address) and any optional information you wish to provide (e.g., FAX number, website, mailstop code, additional email addresses or phone numbers, Division/Department). Click the “Create Account” button.
- Read the user agreement and click the “Accept” button to indicate that you understand your responsibilities and agree to comply with the rules of behavior for PAMS.
- PAMS will take you the “Having Trouble Logging In?” page. (Note: If you reviewed for or were listed as PI on a prior submission to SC but have not previously created an account, you may already be linked to an institution in PAMS. If this is the case, PAMS will take you to the PAMS home page.)

2. REGISTER TO YOUR INSTITUTION:

- Click the link labeled “Option 2: I know my institution and I am here to register to the institution.” (Note: If you previously created a PAMS account but did not register to an institution at that time, you must click the Institutions tab and click the “Register to Institution” link.)
PAMS will take you to the “Register to Institution” page.

Type a word or phrase from your institution name in the field labeled, “Institution Name like,” choose the radio button next to the item that best describes your role in the system, and click the “Search” button. A “like” search in PAMS returns results that contain the word or phrase you enter; you need not enter the exact name of the institution, but you should enter a word or phrase contained within the institution name. (Hint: If your institution has an acronym, such as ANL for Argonne National Laboratory or UCLA for the Regents of the University of California, Los Angeles, you may search for the acronym under “Institution Name like.” Many institutions with acronyms are listed in PAMS with their acronyms in parentheses after their names.)

Find your institution in the list that is returned by the search and click the “Actions” link in the Options column next to the institution name to obtain a dropdown list. Select “Add me to this institution” from the dropdown. PAMS will take you to the “Institutions – List” page.

If you do not see your institution in the initial search results, you can search again by clicking the “Cancel” button, clicking the Option 2 link, and repeating the search.

All DOE National Laboratories have established profiles in PAMS, so please keep searching until you find your laboratory.

For help with PAMS, click the “External User Guide” link on the PAMS website, https://pamspublic.science.energy.gov/. You may also contact the PAMS Help Desk, which can be reached Monday through Friday, 9AM – 5:30 PM Eastern Time. Telephone: (855) 818-1846 (toll free) or (301) 903-9610, Email: sc.pams-helpdesk@science.doe.gov. All submissions and inquiries about this DOE National Laboratory Announcement should reference LAB 19-2037.
UPDATES AND REMINDERS

RECOMMENDATION

The DOE SC encourages you to register in all systems as soon as possible. You are also encouraged to submit letters of intent, pre-proposals, and proposals well before the deadline.

DATA MANAGEMENT PLAN

ACKNOWLEDGMENT OF FEDERAL SUPPORT

SC published guidance about how its support should be acknowledged at http://science.energy.gov/funding-opportunities/acknowledgements/.

AVOIDING ERRORS

The following advice is compiled from actual experiences of applicants for SC awards.

- Please ensure that the research narrative is comprised of one and only one Portable Document Format (PDF) file, including all appendices, when it is uploaded.
- When using the PAMS website at https://pamspublic.science.energy.gov, please avoid using the back-arrow button in your web browser to navigate.
- Please ensure that the proposal contains no personally identifiable information (PII).
- Please ensure that the budget is calculated using the applicable negotiated indirect cost and fringe benefit rates.
GENERAL INQUIRIES ABOUT THIS ANNOUNCEMENT SHOULD BE DIRECTED TO:

Technical/Scientific Program Contacts:
  Dr. Nirmol Podder
  301-903-9536
  Nirmol.Podder@science.doe.gov

Administrative Contact (questions about budgets and eligibility):
  Ms. Marty Carlin
  301-903-3287
  Marty.Carlin@science.doe.gov

SUMMARY

The DOE SC program in Fusion Energy Sciences (FES), hereby announces its interest in receiving proposals for centers and designated user facilities in low temperature plasma science and engineering. Centers, that are cohesive and synergistic, should be formed by a closely-interacting group of investigators. Designated user facilities should be similar to the ones outlined in Chapter 5 of the 2016 Frontiers of Plasma Science Workshops report and may be hosted by a group of institutions or a single institution. Both centers and user facilities should be able to address one or more topical areas at the frontier of low temperature plasma science and engineering. Specific research areas of interest include:

- interfacial plasma (i.e., low temperature plasma coming into contact with liquid to produce new chemical reactivity through a gas-liquid interface);
- interaction of plasma with biomaterials (e.g., understanding how plasma-produced chemical reactivity is delivered through multiple interfaces, such as liquid, cells, tissue, polymers);
- control of plasma-electromagnetic interaction (e.g., fundamental understanding of how radio-frequency electromagnetic power produces controllable plasmas to enable microelectronics processing);
- Plasma catalysis (e.g., understanding the plasma reactivity and catalyst selectivity);
- Plasma aided combustion (e.g., control of pulsed plasmas to improve the efficiency of chemical processing);
- Interface between plasma and solid-state physics (e.g., understanding the boundary layer between plasma and solid-state surface);
- Coherent structures (e.g., understanding electric self-organization in low temperature plasmas);
- Other emerging areas such as plasma aided aeronautics, plasma process control through machine learning, etc.
Consistent with the recommendation made in the 2016 Frontiers of Plasma Science Workshops report, the goal of this Lab Announcement is to steward designated user facilities and/or centers that will have the capability for a broad spectrum of plasma parameter measurements and have significant potential for advancing fundamental and applied research in low temperature plasmas.

Excluded from this call is research on low-energy nuclear reactions and “cold fusion”.

SUPPLEMENTARY INFORMATION

Program Objective
This Lab Announcement provides a method to support multi-institutional centers, and collaborative user facilities open to the entire scientific community, with an objective of increasing the fundamental understanding of low temperature plasma science and engineering (for more information, see Fusion Energy Sciences (FES): A Ten-Year Perspective (2015-2025). To accomplish this goal, FES seeks to advance the frontier of low temperature plasma science and engineering through supporting one or more centers and/or designated user facilities. The science enabled by such centers or facilities should support a wide range of diagnostic capabilities and a broad-based collaborative research or external user research program.

Applications submitted in response to this Lab Announcement may request:
- Support for lead and partner institutions scientific research for a center;
- Support for host institution(s) scientific research and operation cost, and/or equipment, diagnostics, and upgrade costs for a user facility.

User facility operations cost may include the cost of running the experiments for a sufficient number of hours per year for both an internal research effort (from the host institutions) and an external user research program. Cost for minor upgrades and advanced diagnostics may be included for both centers and facilities.

Description of Topical Areas
The specific research areas/capabilities of interest are as follows:

1. Interfacial Plasma
Specific areas of interest include, but are not limited to, understanding: (1) how electrons are generated and transported in liquids; (2) the method of transport of electrons, ions, and neutrals through the plasma-liquid interface; (3) the effect of plasma-enhanced kinetics on species concentration and phase equilibrium at the interface; and (4) the conditions when the plasma may be generated directly in the liquid phase.

2. Interaction of Plasma with Biomaterials
Specific areas of interest include, but are not limited to: (1) controlling the interactions of plasmas at permeable, reactive, dynamic, charged interfaces exemplified by biological liquids, cells, tissues, and polymers; (2) understanding the effect of plasma on proteins, polymers, and cells; (3) controlling plasma to generate desired radicals, ions, and photons intended to provide beneficial biological effects; and (4) understanding how the beneficial chemical and charged particle activation produced by plasma coupled to biochemistry.
3. Control of Plasma-Electromagnetic Interaction
Specific areas of interest include, but are not limited to: (1) fundamental understanding of how radio-frequency electromagnetic power produces controllable plasmas to enable microelectronics processing; (2) understanding the interactions of THz radiation with microplasma arrays or structured plasmas; (3) Understanding scattering, absorption, and phase shifting properties of microplasmas; and (4) understanding the self-organized structures in plasmas produced by THz radiation.

4. Plasma catalysis
Specific areas of interest include, but are not limited to: (1) understanding how catalysts promote surface chemical reactivity and selectivity; (2) understanding how plasmas in contact with a catalyst affect the basic operation of that catalyst; (3) customizing both the plasma source and the catalyst to take advantage of their symbiotic properties; and (4) controlling energy distribution and radical chemical production to drive advances in surface and water catalysis.

5. Plasma aided combustion
Specific areas of interest include, but are not limited to: (1) understanding dominant energy transfer and chemical reaction processes in plasmas; (2) understanding how the application of plasmas to flames improves the fuel efficiency and flame stability; (3) controlling pulsed plasmas to improve the efficiency of chemical processing; and (4) improving predicting capability for optimizing the partitioning of discharge energy.

6. Interface between plasma and solid-state physics
Specific areas of interest include, but are not limited to: (1) understanding how intense sheath electric field modifies the solid interface; (2) controlling the species fluxes and energy distributions both in the plasma and at the surface; (3) understanding the factors that influence the distribution functions and fundamental behavior of the plasmas; and (4) understanding the plasma-solid interface and leveraging the interfacial condition to develop novel applications.

7. Coherent structures
Specific areas of interest include, but are not limited to: (1) understanding how the redistribution of energy and momentum in physical or phase space give rise to coherent structures in low temperature plasmas; (2) controlling the parameters that determine the mode transition between homogenous turbulence and various modes with coherent structures; (3) understanding plasma conditions and characteristics that are necessary for nucleation and growth of nanoparticles; and (4) understanding the interaction of nanoparticles with plasma and their transport in plasma.

For a successful research program:
1. The Plasma Science Center or User Facility will be capable of addressing multiple frontier plasma science questions by supporting a wide range of diagnostic capabilities.
2. The User Facility will run an open, broad-based external user program in which the facility resources are allocated by merit review of the proposed work.
Reviewers will comment (see Section V - Application Review Information) on research needs at the frontier of low temperature plasma science and engineering, center or user facility structure and plan, external user demand, as well as management of the user facility operation and user research program.

Management Structure
The PI must identify a management structure that enables an effective functioning of the center or user facility. The structure and management must be sufficiently flexible to adapt quickly to changing technical challenges and scientific needs. Furthermore, the application should specify the requested level of support for each task. Typical duties, responsibilities, and authorities for the PI (who must be employed by the lead institution) include serving as the overall leader of the project and serving as the primary contact responsible for communications with the DOE program managers. The management plan must specify a timeline that will allow progress and contributions to be measured over the course of the research. For example, these could take the form of milestones for progress in the various components of the research and development.

Proposed user facilities must conform as closely as possible to the definition of an SC user facility. For more information, see here: http://science.energy.gov/user-facilities/policies-and-processes/definition/

Partnership
If a center or user facility is to be formed by multiple institutions, the lead institution must submit the application, which will contain the technical narratives and budgets for the entire research program, including the statements of work and budgets for all partner institutions. A partner institution’s effort is to be included in the application as a proposed subaward from the lead institution. Collaborative applications, with multiple institutions submitting identical narratives, are not to be submitted.

Resources
1. Frontiers of Plasma Science Workshops, 2016
3. Plasma Science: Advancing Knowledge in the National Interest, 2007

Open Science
SC is dedicated to promoting the values of openness in Federally-supported scientific research, including, but not limited to, ensuring that research may be reproduced and that the results of Federally-supported research are made available to other researchers. These objectives may be met through any number of mechanisms including, but not limited to, data access plans, data sharing agreements, the use of archives and repositories, and the use of various licensing schemes.

The use of the phrase “open-source” does not refer to any particular licensing arrangement, but is to be understood as encompassing any arrangement that furthers the objective of openness.
Section II – AWARD INFORMATION

A. TYPE OF AWARD INSTRUMENT

DOE anticipates awarding laboratory work authorizations under this DOE National Laboratory Program Announcement.

Any awards made under this Announcement will be subject to the provisions of the contract between DOE and the awardee National Laboratory.

B. ESTIMATED FUNDING

Research Awards are expected to be made for a period of up to five years at a funding level appropriate for the proposed scope of work. Total funding up to $16,000,000 is expected to be made available for awards under this LAB Announcement and its companion FOA. The precise breakdown of funds between the LAB Announcement and the FOA will depend upon the number of meritorious proposals and the availability of appropriated funds.

Support for future years will be contingent on the availability of appropriated funds, progress of research and/or external user programs, FES programmatic needs, and satisfactory completion of a midterm review by peers, users, or other means. DOE is under no obligation to pay for any costs associated with the preparation or submission of a proposal.

C. MAXIMUM AND MINIMUM AWARD SIZE

The award size will depend on the number of meritorious proposals and the availability of appropriated funds.

**Ceiling**  
Approximately $1,700,000 per year

**Floor**  
Approximately $300,000 per year

D. EXPECTED NUMBER OF AWARDS

The exact number of awards will depend on the number of meritorious proposals and the availability of appropriated funds.

E. ANTICIPATED AWARD SIZE

The award size will depend on the number of meritorious proposals and the availability of appropriated funds.

F. PERIOD OF PERFORMANCE
Continuation funding (funding for the second and subsequent budget periods) is contingent on:
(1) availability of funds appropriated by Congress and future year budget authority; (2) progress
towards meeting the objectives of the approved application; (3) submission of required reports;
(4) satisfactory mid-term review and other reviews, and (5) compliance with the terms and
conditions of the award.

G. TYPE OF PROPOSAL

DOE will accept new or renewal DOE National Laboratory Proposals under this DOE National
Laboratory Announcement. Please only submit a PAMS lab technical proposal in response to
this Announcement; do not submit a DOE Field Work Proposal (FWP) at this time. SC will
request FWPs later from those selected for funding consideration under this Announcement.
Section III – ELIGIBILITY INFORMATION

A. ELIGIBLE APPLICANTS AND TOPICS

This is a DOE National Laboratory-only Announcement. FFRDCs from other Federal agencies are not eligible to submit in response to this Program Announcement.

B. COST SHARING

Cost sharing is not required.

C. ELIGIBLE INDIVIDUALS

Individuals with the skills, knowledge, and resources necessary to carry out the proposed research as a Principal Investigator (PI) are invited to work with their organizations to develop a proposal. Individuals from underrepresented groups as well as individuals with disabilities are always encouraged to apply.

D. LIMITATIONS ON SUBMISSIONS

No more than two proposals (or pre-proposals) will be accepted from a lead institution and an individual may participate as a Principal Investigator on one proposal only. An institution is strongly encouraged to develop and submit its best research ideas into one single center proposal or one single user facility proposal.
Section IV – PROPOSAL AND SUBMISSION INFORMATION

A. ADDRESS TO REQUEST PROPOSAL PACKAGE

Proposal submission instructions are available in this Announcement on the DOE SC Portfolio Analysis and Management System (PAMS). Screenshots showing the steps in DOE National Laboratory proposal submission are available in the PAMS External User Guide, accessible by navigating to https://pamspublic.science.energy.gov and clicking on the “PAMS External User Guide” link.

Proposals submitted outside of PAMS will not be accepted.

B. LETTER OF INTENT AND PRE-PROPOSAL

1. Letter of Intent

A Letter of Intent is not required.

2. Pre-proposal

PRE-PROPOSAL DUE DATE

See Section IV, Part E.

ENCOURAGE/DISCOURAGE DATE

See Section IV, Part E.

A pre-proposal is required and must be submitted no later than 01/25/2019 at 5 PM Eastern Time.

Pre-proposals will be reviewed for responsiveness of the proposed work to the research topics identified in this Announcement. DOE will send a response by email to each applicant encouraging or discouraging the submission of a full proposal by 02/08/2019. Applicants who have not received a response regarding the status of their preproposal by this date are responsible for contacting the program to confirm this status.

Only those applicants that receive notification from DOE encouraging a full proposal may submit full proposals. No other full proposals will be considered.

The pre-proposal attachment must include, at the top of the first page, the following information:

Title of Preproposal
Principal Investigator Name, Job Title
Institution
PI Phone Number, PI Email Address
Laboratory Announcement Number: LAB 19-2037
This information must be followed by a clear and concise description of the objectives and technical approach of the proposed research for the center or user facility. Please include the following as well as other relevant information:

1. Research areas and/or operation regimes;
2. Plasma sources and/or plasma parameters (geometry, pressure, current, voltage, discharge type, normalized electric field, plasma density and temperature, chemical species, etc.);
3. A brief description of the diagnostics and/or modeling tools (computer codes) that are currently available, facility enhancement and/or diagnostic needs;
4. Statements on institutional commitment, facility management structure and plan, and/or external user program;
5. Rough estimates of how many external users might be expected for the user facility or the names of the partnering institutions for the center.

The pre-proposal may not exceed 10 pages, with a minimum text font size of 11 point and margins no smaller than one inch on all sides. Figures and references, if included, must fit within the ten-page limit.

The pre-proposal must also include a list of the names and institutional affiliations of all participating investigators, including collaborators and consultants on the proposed project. For each funded investigator, provide a list of collaborative co-investigators including co-authors of the past 48 months, co-editors of the past 24 months, graduate and postdoctoral advisors/advisees, and close associations. This list of participants and collaborators will not count toward the page limit for the pre-application.

PRE-PROPOSAL REVIEW

Those pre-proposals that are encouraged will be used to help SC begin planning for the full proposal peer review process. SC’s intent in discouraging submission of certain full proposals is to save the time and effort of applicants in preparing and submitting full proposals not responsive to this FOA.

The PI will be automatically notified when the pre-proposal is encouraged or discouraged. The DOE SC Portfolio Analysis and Management System (PAMS) will send an email to the PI from PAMS.Autoreply@science.doe.gov, and the status of the pre-proposal will be updated at the PAMS website https://pamspublic.science.energy.gov/. Notifications are sent as soon as the decisions to encourage or discourage are finalized.

PRE-PROPOSAL APPLICATION SUBMISSION

It is important that the pre-proposal be a single file with extension .pdf, .docx, or .doc. The pre-proposal must be submitted electronically through the DOE SC Portfolio Analysis and Management System (PAMS) website https://pamspublic.science.energy.gov/. The Principal Investigator and anyone submitting on behalf of the Principal Investigator must register for an account in PAMS before it will be possible to submit a pre-proposal. All PIs and those submitting pre-proposals on behalf of PIs are encouraged to establish PAMS accounts as soon as
possible to avoid submission delays.

You may use the Internet Explorer, Firefox, Google Chrome, or Safari browsers to access PAMS.

Please see A. DOE SC Portfolio Analysis and Management System (PAMS) under Registrations, above, for instructions about how to register in PAMS.

Submit Your Pre-Proposal:

- Create your pre-proposal (called a preproposal in PAMS) outside the system and save it as a file with extension .docx, .doc, or .pdf. Make a note of the location of the file on your computer so you can browse for it later from within PAMS.
- Log into PAMS and click the Proposals tab. Click the “View / View / Respond to DOE National Laboratory Announcements” link and find the current announcement in the list. Click the “Actions/Views” link in the Options column next to this announcement to obtain a dropdown menu. Select “Submit Preproposal” from the dropdown.
- On the Submit Preproposal page, select the institution from which you are submitting this preproposal from the Institution dropdown. If you are associated with only one institution in the system, there will only be one institution in the dropdown.
- Note that you must select one and only one Principal Investigator (PI) per preproposal; to do so, click the “Select PI” button on the far right side of the screen. Find the appropriate PI from the list of all registered users from your institution returned by PAMS. (Hint: You may have to sort, filter, or search through the list if it has multiple pages.) Click the “Actions” link in the Options column next to the appropriate PI to obtain a dropdown menu. From the dropdown, choose “Select PI.”
- If the PI for whom you are submitting does not appear on the list, it means he or she has not yet registered in PAMS. For your convenience, you may have PAMS send an email invitation to the PI to register in PAMS. To do so, click the “Invite PI” link at the top left of the “Select PI” screen. You can enter an optional personal message to the PI in the “Comments” box, and it will be included in the email sent by PAMS to the PI. You must wait until the PI registers before you can submit the preproposal. Save the preproposal for later work by clicking the “Save” button at the bottom of the screen. It will be stored in “My Preproposals” for later editing.
- Enter a title for your preproposal.
- Select the appropriate technical contact from the Program Manager dropdown.
- To upload the preproposal file into PAMS, click the “Attach File” button at the far right side of the screen. Click the “Browse” (or “Choose File” depending on your browser) button to search for your file. You may enter an optional description of the file you are attaching. Click the “Upload” button to upload the file.
- At the bottom of the screen, click the “Submit to DOE” button to save and submit the preproposal to DOE.
- Upon submission, the PI will receive an email from the PAMS system <PAMS_Autoreply@science.doe.gov> acknowledging receipt of the preproposal.
You are encouraged to register for an account in PAMS at least a week in advance of the preproposal submission deadline so that there will be no delays with your submission.

**WARNING:** The PAMS website at [https://pampspublic.science.energy.gov](https://pampspublic.science.energy.gov) will permit you to edit a previously submitted preproposal in the time between your submission and the deadline. If you choose to edit, doing so will remove your previously submitted version from consideration. If you are still editing at the time of the deadline, you will not have a valid submission. Please pay attention to the deadline.

For help with PAMS, click the “External User Guide” link on the PAMS website, [https://pampspublic.science.energy.gov/](https://pampspublic.science.energy.gov/). You may also contact the PAMS Help Desk, which can be reached Monday through Friday, 9 AM – 5:30 PM Eastern Time. Telephone: (855) 818-1846 (toll free) or (301) 903-9610, email: sc.pams-helpdesk@science.doe.gov. All submission and inquiries about this Funding Opportunity Announcement should reference **LAB 19-2037**.

Preproposals submitted outside PAMS will not be considered. Preproposals may not be submitted through Grants.gov or www.FedConnect.net.

**C. CONTENT AND PROPOSAL FORMS**

**PROPOSAL DUE DATE**

*See Section IV, Part E.*

Files that are attached to the forms must be PDF files unless otherwise specified in this announcement. Attached PDF files must be plain files consisting of text, numbers, and images without editable fields, signatures, passwords, redactions, or other advanced features available in some PDF-compatible software. Do not attach PDF portfolios.

**WARNING:** The PAMS website at [https://pampspublic.science.energy.gov](https://pampspublic.science.energy.gov) will permit you to edit a previously submitted proposal in the time between your submission and the deadline. If you choose to edit, doing so will remove your previously submitted version from consideration. If you are still editing at the time of the deadline, you will not have a valid submission. Please pay attention to the deadline.

**RESUBMISSION OF PROPOSALS**

Proposals submitted under this Announcement may be withdrawn from consideration by using SC’s PAMS website at [https://pampspublic.science.energy.gov](https://pampspublic.science.energy.gov). Proposals may be withdrawn at any time between when the Laboratory submits the application and when DOE makes the application available to merit reviewers. Such withdrawals take effect immediately and cannot be reversed.

After a proposal is withdrawn, it may be resubmitted, if this Announcement is still open for the submission of applications. Such resubmissions will only count as one submission if this Announcement restricts the number of proposals from an applicant.
SC will usually consider the last submission, according to its timestamp, to be the intended version. Please consult with your program manager to resolve any confusion about which version of a proposal should be considered.

**IMPROPER CONTENTS OF PROPOSALS**

Proposals submitted under this Announcement will be stored in controlled-access systems, but they may be made publicly available if an award is made, and they will be made available to merit reviewers. As such, it is critical that Laboratories follow these guidelines:

- Do not include information subject to any legal restriction on its open distribution, whether classified, export control, or unclassified controlled nuclear information.
- Do not include sensitive and protected personally identifiable information, including social security numbers, birthdates, citizenship, marital status, or home addresses. Pay particular attention to the content of biographical sketches and curriculum vitae.
- Do not include letters of support from Federal officials.
- Do not include letters of support on Federal letterhead. Letters that are not letters of support (such as letters confirming access to sites, facilities, equipment, or data; or letters from cognizant Contracting Officers) may be on Federal letterhead.
- Clearly mark all proprietary or trade-secret information.

**LETTERS**

Each proposal must be accompanied by a letter from the lead institution’s Director (or equivalent) to the FES technical program contact, stating the institution’s long-term commitment to the proposed center or user facility and describing the level of institutional support (e.g., lab space, computational tools, research infrastructure, machine shop, matching funds, student research and other support).

No letter of support from users for a user facility should be included in the proposal. Other optional letters of partnership may contain a brief description and must use the following format:

Dear <Principal Investigator Name>:

If your application / proposal entitled, “<Proposal Name>,” is selected for funding by DOE, it is my intent to contribute to this research project by <Complete sentence with a very short description of what the partner offers to do or provide>.

Thank you for the opportunity to participate.

Sincerely,

<Partner’s Name and Signature Block>

**1. Summary of Proposal Contents and Information about PAMS**

Each DOE National Laboratory proposal will contain the following sections:
• Budget, entered into PAMS as structured data using the PAMS budget form
• Abstract (one page), entered into PAMS as a separate pdf
• Budget justification, entered into PAMS as a separate pdf
• Proposal, combined into a single pdf containing the following information:
  o Proposal Cover Page
  o Table of Contents
  o Project Narrative (main technical portion of the proposal, including background/introduction, proposed research and methods, timetable of activities, and responsibilities of key project personnel)
  o Appendix 1: Biographical Sketch(es)
  o Appendix 2: Current and Pending Support
  o Appendix 3: Bibliography and References Cited
  o Appendix 4: Facilities and Other Resources
  o Appendix 5: Equipment
  o Appendix 6: Data Management Plan
  o Appendix 7: Other Attachments (optional)

SUBMISSION INSTRUCTIONS

Completed proposals must be submitted into the DOE SC Portfolio Analysis and Management System (PAMS). For help with PAMS, click the “External User Guide” link on the PAMS website, https://pamspublic.science.energy.gov/. You may also contact the PAMS Help Desk, which can be reached Monday through Friday, 9:00 AM – 5:30 PM Eastern Time. Telephone: (855) 818-1846 (toll free number) or (301) 903-9610, Email: sc.pams-helpdesk@science.doe.gov. All submissions and inquiries about this Program Announcement should reference LAB 19-2037. Full proposals submitted in response to this Program Announcement must be submitted to PAMS no later than 3/25/2019, at 5:00 PM Eastern Time.

All PIs and those submitting on behalf of PIs are encouraged to establish PAMS accounts as soon as possible to ensure timely submissions. To register, click “Create New PAMS Account” on the website https://pamspublic.science.energy.gov/ and follow the instructions for creating an account.

The following information is provided to help with proposal submission. Detailed instructions and screen shots can be found in the user guide. To find the user guide, click the “External User Guide” link on the PAMS home page. Onscreen instructions are available within PAMS.

• Log into PAMS. From the proposals tab, click the “View DOE National Laboratory Announcements” link and find the current announcement in the list. Click the “Actions/Views” link in the Options column next to this Announcement to obtain a dropdown menu. Select “Submit Proposal” from the dropdown.
• Note that you must select one and only one Principal Investigator (PI) per proposal; to do so, click the “Select PI” button on the far right side of the screen. Find the appropriate PI from the list of all registered users from your institution returned by PAMS. (Hint: You may have to sort, filter, or search through the list if it has multiple pages.) Click the “Actions” link in
the Options column next to the appropriate PI to obtain a dropdown menu. From the dropdown, choose “Select PI.”

- If the PI for whom you are submitting does not appear on the list, it means he or she has not yet registered in PAMS. For your convenience, you may have PAMS send an email invitation to the PI to register in PAMS. To do so, click the “Invite PI” link at the top left of the “Select PI” screen. You can enter an optional personal message to the PI in the “Comments” box, and it will be included in the email sent by PAMS to the PI. You must wait until the PI registers before you can submit the proposal. Save the proposal for later work by selecting “Save” from the dropdown at the bottom of the screen and then clicking the “Go” button. It will be stored in “My Proposals” for later editing. As a minimum, you must complete all the required fields on the PAMS cover page before you can save the proposal for the first time.

- The cover page, budget, and attachments sections of the lab proposal are required by PAMS before it can be submitted to DOE.
- Complete the sections in PAMS one at a time, starting with the cover page and following the instructions for each section.
- Click the “+View More” link at the top of each section to expand the onscreen instructions. On the budget section, click the “Budget Tab Instructions” link to obtain detailed guidance on completing the budget form.
- Save each section by selecting either “Save” (to stay in the same section) or “Save… and Continue to the Next Section” (to move to the next section) from the dropdown menu at the bottom of the screen, followed by clicking the “Go” button.
- If you save the proposal and navigate away from it, you may return later to edit the proposal by clicking the “View My Existing Proposals” or “My Proposals” links within PAMS.
- You must enter a budget for each annual budget period.
- You must also enter a budget for each proposed sub-award. The sub-award section can be completed using the same steps used for the budget section.
- In the attachments section of the lab proposal, the abstract, the budget justification, and the proposal narrative are required and must be submitted as separate files.
- You must bundle everything other than the budget, abstract, and budget justification into one single PDF file to be attached under “Proposal Attachment.”
- Do not attach anything under “Other Attachments.”
- To upload a file into PAMS, click the “Attach File” button at the far right side of the screen. Click the “Browse” (or "Choose File" depending on your browser) button to search for your file. You may enter an optional description of the file you are attaching. Click the “Upload” button to upload the file.
- Once you have saved all of the sections, the “Submit to DOE” option will appear in the dropdown menu at the bottom of the screen.
- To submit the proposal, select “Submit to DOE” from the dropdown menu and then click the “Go” button.
- Upon submission, the PI will receive an email from the PAMS system <<PAMS_Autoreply@science.doe.gov>> acknowledging receipt of the proposal.
- The proposal will also appear under My Proposals with a Proposal Status of “Submitted to DOE.”
Please only submit a PAMS lab technical proposal in response to this Announcement; do not submit a DOE Field Work Proposal (FWP) at this time. SC will request FWPs later from those selected for funding consideration under this Announcement.

For help with PAMS, click the “External User Guide” link on the PAMS website, https://pamspublic.science.energy.gov/. You may also contact the PAMS Help Desk, which can be reached Monday through Friday, 9:00 AM – 5:30 PM Eastern Time. Telephone: (855) 818-1846 (toll free number) or (301) 903-9610, Email: sc.pams-helpdesk@science.doe.gov. All submissions and inquiries about this Program Announcement should reference LAB 19-2037.

2. Detailed Contents of the Proposal

BUDGET AND BUDGET EXPLANATION

The budget must be submitted into PAMS using the PAMS budget form. Research proposed under this Announcement may only have one annual budget period.

PAMS will calculate the cumulative budget totals for you.

A written justification of each budget item is to follow the budget pages. The budget justification must be placed in a separate, single pdf document and attached on the appropriate screen in PAMS. Further instructions regarding the budget and justification are given below and in the PAMS software.

PROJECT SUMMARY/ABSTRACT (NO MORE THAN ONE PAGE)

The project summary/abstract must contain a summary of the proposed activity suitable for dissemination to the public. It must be a self-contained document that identifies the name of the applicant, the Principal Investigator (PI), the project title, the objectives of the project, a description of the project, including methods to be employed, the potential impact of the project (i.e., benefits, outcomes). This document must not include any proprietary or sensitive business information as the Department may make it available to the public. The project summary must not exceed 1 page when printed using standard 8.5” by 11” paper with 1” margins (top, bottom, left and right) with font not smaller than 11 point. The one-page project summary/abstract must be placed in a separate, single pdf document and attached on the appropriate screen in PAMS.

The abstract may be used to prepare publicly accessible reports about DOE-supported research.

DOE COVER PAGE
(PART OF PROJECT NARRATIVE)

The following proposal cover page information may be placed on a plain page. No form is required. This cover page will not count in the project narrative page limitation.

- The project title:
- Applicant/Institution:
COVER PAGE SUPPLEMENT FOR PARTNERSHIP
(PART OF PROJECT NARRATIVE)

If a user facility is formed as part of a multi-institutional partnership, the lead institution should submit the application, which should contain the technical narratives and budgets for the entire research program, including the statements of work and budgets for all individual institutions. Each partner institution’s budget should be presented as a subaward to the lead institution.

PROJECT NARRATIVE (NO MORE THAN 32 PAGES LONG)

The project narrative must not exceed 32 pages of technical information, including charts, graphs, maps, photographs, and other pictorial presentations, when printed using standard 8.5” by 11” paper with 1 inch margins (top, bottom, left, and right). The font must not be smaller than 11 point. Merit reviewers will only consider the number of pages specified in the first sentence of this paragraph. This page limit does not apply to the Cover Page, Budget Page(s), Budget Justification, biographical material, publications and references, and appendices, each of which may have its own page limit.

Do not include any Internet addresses (URLs) that provide supplementary or additional information that constitutes a part of the proposal. Merit reviewers are not required to access Internet sites; however, Internet publications in a list of references will be treated identically to print publications. See Part VIII.D for instructions on how to mark proprietary proposal information. To attach a Project Narrative, click “Add Attachment.”

Background/Introduction: Explanation of the importance and relevance of the proposed work as well as a review of the relevant literature. Provide plasma sources and/or plasma parameters, research areas, operation regimes, etc., for the proposed center or user facility.

Proposed Research and Methods: Identify the hypotheses to be tested (if any) and details of the methods to be used including the integration of experiments with theoretical and computational research efforts.

Cost Estimate for Upgrade Needs: If needed, identify facility enhancement and/or diagnostic needs for existing facilities and provide cost estimates.
**Timetable of Activities**: Timeline for all major activities including milestones and deliverables.

**Project Objectives**: This section should provide a clear, concise statement of the specific objectives/aims of the proposed project.

The Project Narrative comprises the research plan for the project. It should contain enough background material in the Introduction, including review of the relevant literature, to demonstrate sufficient knowledge of the state of the science. The major part of the narrative should be devoted to a description and justification of the proposed project, including details of the method to be used. It should also include a timeline for the major activities of the proposed project, and should indicate which project personnel will be responsible for which activities. There should be no ambiguity about which personnel will perform particular parts of the project, and the time at which these activities will take place.

**Center Management Plan**: The center proposal must include a project management plan that clearly indicates the roles and responsibilities of the lead institution and all partner institutions. The plan should also indicate how activities are be coordinated and communicated among the partners.

**Facility Management Plan and External User Program**: The facility proposal must include a facility management plan that clearly states the roles and responsibilities of the lead institution. For a distributed user facility, the plan should also indicate the roles and responsibilities of all partner institutions and how activities are be coordinated and communicated among the partners. It should also include a statement on administering an external user program. Provide an estimate of how many users might be expected in all topical areas combined.

**APPENDIX 1: BIOGRAPHICAL SKETCH**

Provide a biographical sketch for the PI and each senior/key person as an appendix to your technical narrative.

As part of the sketch, provide information that can be used by reviewers to evaluate the PI’s potential for leadership within the scientific community. Examples of information of interest are invited and/or public lectures, awards received, scientific program committees, conference or workshop organization, professional society activities, special international or industrial partnerships, reviewing or editorship activities, or other scientific leadership experiences.

- Provide the biographical sketch information as an appendix to your project narrative.
- Do not attach a separate file.
- The biographical sketch appendix will not count in the project narrative page limitation.
- The biographical information (curriculum vitae) for each person must not exceed 2 pages when printed on 8.5” by 11” paper with 1 inch margins (top, bottom, left, and right) with font not smaller than 11 point and must include:

The biographical information (curriculum vitae) must include the following items within its page limit:
• **Education and Training**: Undergraduate, graduate and postdoctoral training, provide institution, major/area, degree and year.

• **Research and Professional Experience**: Beginning with the current position list, in chronological order, professional/academic positions with a brief description.

• **Publications**: Provide a list of up to 10 publications most closely related to the proposed project. For each publication, identify the names of all authors (in the same sequence in which they appear in the publication), the article title, book or journal title, volume number, page numbers, year of publication, and website address if available electronically. Patents, copyrights and software systems developed may be provided in addition to or substituted for publications.

• **Synergistic Activities**: List no more than 5 professional and scholarly activities related to the effort proposed.

In addition, the biographical sketch must include information to permit DOE to identify individuals who are conflicted with or potentially biased (favorably or unfavorably) against the investigator. Include a section entitled “Identification of Potential Conflicts of Interest or Bias in Selection of Reviewers” that will not count in a page limit: Provide the following information in this section:

• **Collaborators and Co-editors**: List in alphabetical order all persons, including their current organizational affiliation, who are, or who have been, collaborators or co-authors with you on a research project, book or book article, report, abstract, or paper during the 48 months preceding the submission of this application. For publications or collaborations with more than 10 authors or participants, only list those individuals in the core group with whom the Principal Investigator interacted on a regular basis while the research was being done. Also, list any individuals who are currently, or have been, co-editors with you on a special issue of a journal, compendium, or conference proceedings during the 24 months preceding the submission of this application. If there are no collaborators or co-editors to report, state “None.”

• **Graduate and Postdoctoral Advisors and Advisees**: List the names and current organizational affiliations of your graduate advisor(s) and principal postdoctoral sponsor(s). Also, list the names and current organizational affiliations of your graduate students and postdoctoral associates.

**Personally Identifiable Information**: Do not include sensitive and protected personally identifiable information including social security numbers, birthdates, citizenship, marital status, or home addresses. Do not include information that a merit reviewer should not make use of.

This appendix will not count in the project narrative page limitation.

**APPENDIX 2: CURRENT AND PENDING SUPPORT**

Provide a list of all current and pending support (both Federal and non-Federal) for the PI and senior/key persons, including subawardees, for ongoing projects and pending applications. List all sponsored activities or awards requiring a measurable commitment of effort, whether paid or unpaid.

For every activity, list the following items:
• The sponsor of the activity or the source of funding
• The award or other identifying number
• The title of the award or activity
• The total cost or value of the award or activity, including direct and indirect costs. For pending proposals, provide the total amount of requested funding.
• The award period (start date – end date).
• The person-months of effort per year being dedicated to the award or activity
• Briefly describe the research being performed and explicitly identify any overlaps or synergies with the proposed research.

Provide the Current and Pending Support as an appendix to your project narrative. Concurrent submission of an application to other organizations for simultaneous consideration will not prejudice its review.
• Do not attach a separate file.
• This appendix will not count in the project narrative page limitation.

APPENDIX 3: BIBLIOGRAPHY & REFERENCES CITED

Provide a bibliography of any references cited in the Project Narrative. Each reference must include the names of all authors (in the same sequence in which they appear in the publication), the article and journal title, book title, volume number, page numbers, and year of publication. For research areas where there are routinely more than ten coauthors of archival publications, you may use an abbreviated style such as the Physical Review Letters (PRL) convention for citations (listing only the first author). For example, your paper may be listed as, “A Really Important New Result,” A. Aardvark et. al. (MONGO Collaboration), PRL 999. Include only bibliographic citations. Applicants should be especially careful to follow scholarly practices in providing citations for source materials relied upon when preparing any section of the proposal. Provide the Bibliography and References Cited information as an appendix to your project narrative.
• Do not attach a separate file.
• This appendix will not count in the project narrative page limitation.

APPENDIX 4: FACILITIES & OTHER RESOURCES

This information is used to assess the capability of the organizational resources, including subawardee resources, available to perform the effort proposed. Identify the facilities to be used (Laboratory, Animal, Computer, Office, Clinical and Other). If appropriate, indicate their capacities, pertinent capabilities, relative proximity, and extent of availability to the project. Describe only those resources that are directly applicable to the proposed work. Describe other resources available to the project (e.g., machine shop, electronic shop) and the extent to which they would be available to the project. For proposed investigations requiring access to experimental user facilities maintained by institutions other than the applicant, please provide a document from the facility manager confirming that the researchers will have access to the facility. Please provide the Facility and Other Resource information as an appendix to your project narrative.
• Do not attach a separate file.
• This appendix will not count in the project narrative page limitation.

APPENDIX 5: EQUIPMENT

List major items of equipment already available for this project and, if appropriate identify location and pertinent capabilities. Provide the Equipment information as an appendix to your project narrative.
• Do not attach a separate file.
• This appendix will not count in the project narrative page limitation.

APPENDIX 6: DATA MANAGEMENT PLAN

Provide a Data Management Plan (DMP) that addresses the following requirements:
1. DMPs should describe whether and how data generated in the course of the proposed research will be shared and preserved. If the plan is not to share and/or preserve certain data, then the plan must explain the basis of the decision (for example, cost/benefit considerations, other parameters of feasibility, scientific appropriateness, or limitations discussed in #4). At a minimum, DMPs must describe how data sharing and preservation will enable validation of results, or how results could be validated if data are not shared or preserved.
2. DMPs should provide a plan for making all research data displayed in publications resulting from the proposed research digitally accessible to the public at the time of publication. This includes data that are displayed in charts, figures, images, etc. In addition, the underlying digital research data used to generate the displayed data should be made as accessible as possible to the public in accordance with the principles stated in the SC Statement on Digital Data Management (http://science.energy.gov/funding-opportunities/digital-data-management/). This requirement could be met by including the data as supplementary information to the published article, or through other means. The published article should indicate how these data can be accessed.
3. DMPs should consult and reference available information about data management resources to be used in the course of the proposed research. In particular, DMPs that explicitly or implicitly commit data management resources at a facility beyond what is conventionally made available to approved users should be accompanied by written approval from that facility. In determining the resources available for data management at SC User Facilities, researchers should consult the published description of data management resources and practices at that facility and reference it in the DMP. Information about other SC facilities can be found in the additional guidance from the sponsoring program.
4. DMPs must protect confidentiality, personal privacy, Personally Identifiable Information, and U.S. national, homeland, and economic security; recognize proprietary interests, business confidential information, and intellectual property rights; avoid significant negative impact on innovation, and U.S. competitiveness; and otherwise be consistent with all applicable laws, regulations, and DOE orders and policies. There is no requirement to share proprietary data.

DMPs will be reviewed as part of the overall SC research proposal merit review process. Applicants are encouraged to consult the SC website for further information and suggestions for how to structure a DMP: http://science.energy.gov/funding-opportunities/digital-data-
This appendix should not exceed 5 pages including charts, graphs, maps, photographs, and other pictorial presentations, when printed using standard 8.5” by 11” paper with 1 inch margins (top, bottom, left, and right)

Do not attach a separate file.

This appendix will not count in the project narrative page limitation.

Appendix 7: Other Attachment

If you need to elaborate on your responses to questions 1-6 on the “Other Project Information” document, please provide the Other Attachment information as an appendix to your project narrative. Information not easily accessible to a reviewer may be included in this appendix, but do not use this appendix to circumvent the page limitations of the proposal. Reviewers are not required to consider information in this appendix.

Do not attach a separate file.

This appendix will not count in the project narrative page limitation.

3. Detailed Instructions for the Budget

Budgets are required for the entire project period. A budget form must be completed for each budget period of the award, and a cumulative budget form for the entire project period will be populated by PAMS. A detailed budget justification narrative must be included after the budget pages. The justification must cover labor, domestic travel, equipment, materials and supplies, and anything else that will be covered with project funds.

To edit a section on the budget, click the edit icon ( ) for each section on the page. Remember to save all budget periods before moving on to the next section. You can save the budget periods by selecting “Save All Budget Periods” from the dropdown on the lower right corner of the PAMS budget entry screen and then clicking the “Go” button. You can also save any data entry page in PAMS using the blue diskette icon ( ) in the floating toolbar on the bottom of the screen.

Section A. Senior/Key Person (Required)
For each Senior/Key Person, enter the appropriate information. List personnel, salary funds, and the number of months that person will be allocated to the project. Also include a written narrative in the budget justification that fully justifies the need for requested personnel.

Section B. Other Personnel
List personnel, salary funds, and the number of months that person will be allocated to the project. Also include a written narrative in the budget justification that fully justifies the need for requested personnel.

Section C. Equipment Description
For the purpose of this budget, equipment is designated as an item of property that has an acquisition cost of $5,000 or more and an expected service life of more than one year. (Note that
this designation applies for proposal budgeting only and differs from the DOE definition of capital equipment.) List each item of equipment separately and justify each in the budget justification section. Allowable items ordinarily will be limited to research equipment and apparatus not already available for the conduct of the work. General-purpose office equipment, such as a personal computer, is not eligible for support unless primarily or exclusively used in the actual conduct of scientific research.

Section D. Travel
In the budget justification, list each trip’s destination, dates, estimated costs including transportation and subsistence, number of staff traveling, the purpose of the travel, and how it relates to the project. Indicate whether travel cost estimates are based upon quotes from travel agencies; upon past experience of similar number of trips to similar travel destinations; or something else (describe). To qualify for support, attendance at meetings or conferences must enhance the investigator’s capability to perform the research, plan extensions of it, or disseminate its results.

Section E. Participant/Trainee Support Costs:
If applicable, submit training support costs. Educational projects that intend to support trainees (precollege, college, graduate and post graduate) must list each trainee cost that includes stipend levels and amounts, cost of tuition for each trainee, cost of any travel (provide the same information as needed under the regular travel category), and costs for any related training expenses. Participant costs are those costs associated with conferences, workshops, symposia or institutes and breakout items should indicate the number of participants, cost for each participant, purpose of the conference, dates and places of meetings and any related administrative expenses. In the budget justification, indicate whether trainee cost estimates are based upon past experience of support of similar number of trainees on similar projects; past experience of support of similar number of participants attending similar conferences/workshops/symposia; or something else (describe).

Section F. Other Direct Costs:
Enter Other Direct Costs information for each item listed.

- **Materials and Supplies**: Enter total funds requested for materials and supplies in the appropriate fields. In the budget justification, indicate general categories such as glassware, and chemicals, including an amount for each category (items not identified under “Equipment”). Categories less than $1,000 are not required to be itemized. In the budget justification, indicate whether cost estimates are based upon past experience of purchase of similar or like items; quotes/catalog prices of similar or like items; or something else (describe).

- **Publication Costs**: Enter the total publication funds requested. The proposal budget may request funds for the costs of documenting, preparing, publishing or otherwise making available to others the findings and products of the work conducted under the award. In the budget justification, include supporting information. In the budget justification, indicate whether cost estimates are based upon past experience of purchase of similar or like items; vendor quotes of similar publication services; or something else (describe).

- **Consultant Services**: Enter total funds requested for all consultant services. In the budget justification, identify each consultant, the services he/she will perform, total number of
days, travel costs, and total estimated costs. In the budget justification, indicate whether consultant cost estimate is based upon previous experience/quotes for similar or like services; or something else (describe).

- **ADP/Computer Services:** Enter total funds requested for ADP/Computer Services. The cost of computer services, including computer-based retrieval of scientific, technical and education information may be requested. In the budget justification, include the established computer service rates at the proposing organization if applicable. In the budget justification, indicate whether cost estimates are based upon quotes/past experience of purchase of similar computer services; established computer service rates at the proposing institution; or something else (describe).

- **Subawards/Consortium/Contractual Costs:** Enter total costs for all subawards/consortium organizations and other contractual costs proposed for the project. In the budget justification, justify the details.

- **Equipment or Facility Rental/User Fees:** Enter total funds requested for Equipment or Facility Rental/User Fees. In the budget justification, identify each rental/user fee and justify. In the budget justification, indicate whether cost estimates are based upon past experience with similar or like items; vendor quotes of similar items; or something else (describe).

- **Alterations and Renovations:** Enter total funds requested for Alterations and Renovations.

- **In the budget justification,** itemize by category and justify the costs of alterations and renovations, including repairs, painting, removal or installation of partitions, shielding, or air conditioning. Where applicable, provide the square footage and costs.

- **Other:** Add text to describe any other Direct Costs not requested above. Enter costs associated with “Other” item(s). Use the budget justification to further itemize and justify.

**Section G. Direct Costs**
This represents Total Direct Costs (Sections A thru F) and will be calculated by PAMS.

**Section H. Other Indirect Costs**
Enter the Indirect Cost information for each field. Only four general categories of indirect costs are allowed/requested on this form, so please consolidate if needed.

**Section I. Total Direct and Indirect Costs**
This amount will be calculated by PAMS (Sections G + H)

**D. SUBMISSIONS FROM SUCCESSFUL APPLICANTS**
If selected for award, DOE reserves the right to request additional or clarifying information.

**E. SUBMISSION DATES AND TIMES**

1. **Pre-proposal Due Date**

   1/25/2019 at 5:00 PM Eastern Time
You are encouraged to submit your pre-proposal well before the deadline.

2. Encourage/Disourage Date

2/8/2019 at 5:00 PM Eastern Time

3. Proposal Due Date

3/25/2019 at 5:00 PM Eastern Time

You are encouraged to transmit your proposal well before the deadline.

4. Late Submissions

Proposals received after the deadline will not be reviewed or considered for award.

F. FUNDING RESTRICTIONS

Funding for all awards and future budget periods are contingent upon the availability of funds appropriated by Congress and the availability of future-year budget authority.

G. OTHER SUBMISSION AND REGISTRATION REQUIREMENTS

1. Where to Submit

Proposals must be submitted through PAMS to be considered for award.

Please only submit a PAMS lab technical proposal in response to this Announcement; do not submit a DOE Field Work Proposal (FWP) at this time. SC will request FWPs via the Searchable FWP system later from those selected for funding consideration under this Announcement.

2. Registration Process

ONE-TIME REGISTRATION PROCESS

You must complete the one-time registration process (all steps) before you can submit your first proposal through PAMS. Registration instructions appear in the front matter of this Announcement.

For help with PAMS, click the “External User Guide” link on the PAMS website, https://pamspublic.science.energy.gov/. You may also contact the PAMS Help Desk, which can be reached Monday through Friday, 9AM – 5:30 PM Eastern Time. Telephone: (855) 818-1846 (toll free) or (301) 903-9610, Email: sc.pams-helpdesk@science.doe.gov. All submission and inquiries about this DOE National Laboratory Program Announcement should reference LAB 19-2037.
3. Proposal Receipt Notices

Upon submission, the PI will receive an email from the PAMS system <PAMS.Autoreply@science.doe.gov> acknowledging receipt of the proposal.

4. Viewing Submitted Proposals

Upon submission, the proposal will appear under My Proposals for the PI and the Submitter with a Proposal Status of “Submitted to DOE.”
Section V - PROPOSAL REVIEW INFORMATION

A. CRITERIA

1. Initial Review Criteria

Prior to a comprehensive merit evaluation, DOE will perform an initial review to determine that (1) the applicant is eligible for the award; (2) the information required by the Program Announcement has been submitted; (3) all mandatory requirements are satisfied; (4) the proposed project is responsive to the objectives of the Program Announcement, and (5) the proposed project is not duplicative of programmatic work. Proposals that fail to pass the initial review will not be forwarded for merit review and will be eliminated from further consideration.

2. Merit Review Criteria

Proposals will be subjected to scientific merit review (peer review) and will be evaluated against the following criteria, listed in descending order of importance.

- Scientific and/or Technical Merit of the Project;
- Appropriateness of the Proposed Method or Approach;
- Competency of Applicant’s Personnel and Adequacy of Proposed Resources; and
- Reasonableness and Appropriateness of the Proposed Budget.

In addition, the reviewers will comment on the following:
- Adequacy of Center Management Plan (Center Application Only) or Facility Management Plan and External User Program (Facility Application Only)
- Performance under Existing Award (Renewal Application Only)

The evaluation process will also include program policy factors such as the relevance of the proposed research to the terms of the DOE National Laboratory Announcement and the agency’s programmatic needs, the balance of activities within the program, and the utility of the proposed activities to the broader scientific community. Note that external peer reviewers are selected with regard to both their scientific expertise and the absence of conflict-of-interest issues. Both Federal and non-Federal reviewers may be used, and submission of an proposal constitutes agreement that this is acceptable to the investigator(s) and the submitting institution.

The questions below are provided to the merit reviewers to elaborate the criteria:

**Scientific and/or Technical Merit of the Project**

- What are the frontier low temperature plasma science areas and/or questions that will be addressed through the proposed research center or facility? What is the potential for the proposed center or facility to advance knowledge in these areas?
- How innovative and impactful are the research programs proposed by the center, or the internal research and external user programs proposed by the user facility?
• How clearly defined are the five-year scientific goals for the center or user facility? Is the proposed program likely to meet these goals?
• Assess whether the center has demonstrated that the whole of the center’s effort would be substantially greater than the sum of its parts or whether the facility has demonstrated that it will have significant potential for advancing fundamental and applied research in low temperature plasmas.
• Is the Data Management Plan suitable for the proposed research center or facility and to what extent does it support the validation of research results?

APPROPRIATENESS OF THE PROPOSED METHOD OR APPROACH

• How well do the proposed five-year scientific goals justify the center or user facility?
• How appropriate and adequate are the strategy and plan for managing the proposed center or user facility? Has the applicant demonstrated the means for achieving an integrated center or user facility, and plans for leadership and guidance for the scientific and technical direction? Has the applicant demonstrated the need for an open user facility approach involving multiple investigators?
• How detailed are the proposed scientific methods or approaches in the proposal, and how appropriate are they to achieve the stated scientific goals of the center or user facility?
• Does the applicant recognize significant potential problems and consider alternative strategies?

COMPETENCY OF APPLICANT’S PERSONNEL AND ADEQUACY OF PROPOSED RESOURCES

• How well qualified are the applicant and applicant’s personnel to conduct the proposed research activities? Do the applicant and applicant’s key personnel have a proven record of research in the disciplines needed for success in the project?
• How well experienced are the applicant and applicant’s personnel in managing a scientific research program involving multiple institutions or external users?
• How well experienced are the applicant’s senior leadership team members to manage the partners of the center/facility or to manage the facility’s external user programs and personnel of diverse teams of science and technical professionals, and projects of comparable magnitude?

REASONABLENESS AND APPROPRIATENESS OF THE PROPOSED BUDGET

• Is the requested budget for lead institution scientific research and operation cost for the proposed center or user facility appropriate?
• Is the requested operating budget for the center or the proposed user facility reasonable for the planned scientific program?
ADEQUACY OF CENTER MANAGEMENT PLAN OR FACILITY MANAGEMENT PLAN AND EXTERNAL USER PROGRAM

- How well developed are the proposed center or user facility management structure and plan? How effective will they be in carrying out the scientific goals for the center or user facility?
- Are there appropriate plans for engagement of a scientific advisory committee, annual review or user group meeting, summer school, etc.?
- Discuss institutional commitment to ensuring successful operations and maintenance over the expected lifetime of the center or facility.
- For the center and/or user facility, comment on the scientific capability and strength of each partner. For the user facility, comment on the facility’s expected user base and demands for the proposed research areas, and on the availability of appropriate technical expertise to operate and maintain the facility.
- Are there any significant problems in any of the areas of operation, research, center or facility management, and facility external user program?

PERFORMANCE UNDER EXISTING AWARD (RENEWAL APPLICATION ONLY)

- Assess the progress the applicants made during the most recent performance period and the impact of the research on FES General Plasma Science program.
- Have the applicants disseminated the results of their research through publications in peer reviewed journals, meeting and conference presentations, workshops, or other appropriate means?

B. REVIEW AND SELECTION PROCESS

1. Merit Review

Proposals that pass the initial review will be subjected to a formal merit review and will be evaluated based on the criteria above.

2. Program Policy Factors

The Selection Official may consider any of the following program policy factors in making the selection, listed in no order of significance:

- Availability of funds
- Relevance of the proposed activity to SC priorities
- Ensuring an appropriate balance of activities within SC programs
- Performance under current awards
- Institutional history of training and mentoring early-career researchers
- Providing placement for postdoctoral researchers
- Training graduate students in conduct of basic research
- Presence of tenure-track or tenure-equivalent investigators
- Maximizing the use of DOE user facilities
• Ensuring opportunities to investigators not currently supported by DOE
• Quality of partnership
• Participation with multi-institutional teams
• Commitment to sharing the results of research

3. Selection

The Selection Official will consider the findings of the merit review and may consider any of the Program Policy Factors described above.

4. Discussions and Award

The Government may enter into discussions with a selected applicant for any reason deemed necessary. Failure to resolve satisfactorily the issues identified by the Government will preclude award to the applicant.

C. ANTICIPATED NOTICE OF SELECTION AND AWARD DATES

It is anticipated that the award selection process would be completed by July 2019 and awards would be made in Fiscal Year 2019.
Section VI - AWARD ADMINISTRATION INFORMATION

A. AWARD NOTICES

1. Notice of Selection

Selected Applicants Notification: DOE will notify applicants selected for award. This notice of selection is not an authorization to begin performance.

Non-selected Notification: Organizations whose proposals have not been selected will be advised as promptly as possible. This notice will explain why the proposal was not selected.

2. Notice of Award

A work authorization/contract modification issued by the Contracting Officer is the authorizing award document.

B. REPORTING

Annual progress reports from the award investigator will be required and will be due 90 days before the end of each budget year.
Section VII - QUESTIONS/AGENCY CONTACTS

A. QUESTIONS

For help with PAMS, click the “External User Guide” link on the PAMS website, https://pamspublic.science.energy.gov/. You may also contact the PAMS Help Desk, which can be reached Monday through Friday, 9AM – 5:30 PM Eastern Time. Telephone: (855) 818-1846 (toll free) or (301) 903-9610, Email: sc.pams-helpdesk@science.doe.gov. All submission and inquiries about this DOE National Laboratory Program Announcement should reference LAB 19-2037.

Please contact the PAMS help desk for technological issues with the PAMS system.

Questions regarding the specific program areas and technical requirements may be directed to the technical contacts listed for each program within the DOE National Laboratory Program Announcement or below.

Please contact the program staff with all questions not directly related to the PAMS system.

C. DEPARTMENT OF ENERGY, OFFICE OF INSPECTOR GENERAL HOTLINE:

The Office of Inspector General (OIG) maintains a Hotline to facilitate the reporting of allegations of fraud, waste, abuse, or mismanagement in DOE programs or operations. If you wish to report such allegations, you may call, send a letter, or email the OIG Hotline igham hotline@hq.doe.gov. Allegations may be reported by DOE employees, DOE contractors, or the general public. OIG contact information is available at http://energy.gov/ig/services.
Section VIII - OTHER INFORMATION

A. MODIFICATIONS

Notices of any modifications to this DOE National Laboratory Announcement will be posted on the Grants and Contracts website (http://science.energy.gov/grants/).

B. GOVERNMENT RIGHT TO REJECT OR NEGOTIATE

DOE reserves the right, without qualification, to reject any or all proposals received in response to this DOE National Laboratory Announcement and to select any proposal, in whole or in part, as a basis for negotiation and/or award.

C. COMMITMENT OF PUBLIC FUNDS

The Contracting Officer is the only individual who can make awards or commit the Government to the expenditure of public funds. A commitment by other than the Contracting Officer, either explicit or implied, is invalid.

D. PROPRIETARY PROPOSAL INFORMATION

Patentable ideas, trade secrets, proprietary or confidential commercial or financial information, disclosure of which may harm the applicant, should be included in a proposal only when such information is necessary to convey an understanding of the proposed project. The use and disclosure of such data may be restricted, provided the applicant includes the following legend on the first page of the project narrative and specifies the pages of the proposal which are to be restricted:

“The data contained in pages _____ of this proposal have been submitted in confidence and contain trade secrets or proprietary information, and such data shall be used or disclosed only for evaluation purposes.”

To protect such data, each line or paragraph on the pages containing such data must be specifically identified and marked with a legend similar to the following:

“The following contains proprietary information that (name of applicant) requests not be released to persons outside the Government, except for purposes of review and evaluation.”

E. EVALUATION AND ADMINISTRATION BY NON-FEDERAL PERSONNEL

In conducting the merit review evaluation, the Government may seek the advice of qualified non-Federal personnel as reviewers. The Government may also use non-Federal personnel to conduct routine, nondiscretionary administrative activities. The applicant, by submitting its proposal, consents to the use of non-Federal reviewers/administrators. Non-Federal reviewers must sign conflict of interest and non-disclosure agreements prior to reviewing a proposal. Non-Federal personnel conducting administrative activities must sign a non-disclosure agreement.
F. AVAILABILITY OF FUNDS

Funds are not presently available for this award. The Government’s obligation under this award is contingent upon the availability of appropriated funds from which payment for award purposes can be made. No legal liability on the part of the Government for any payment may arise until funds are made available to the Contracting Officer for this award and until the awardee receives notice of such availability, to be confirmed in writing by the Contracting Officer.
