Department of Energy

Privacy Act of 1974; Publication of Compilation of Privacy Act Systems of Records; Notice
DEPARTMENT OF ENERGY

Privacy Act of 1974; Publication of Compilation of Privacy Act Systems of Records

AGENCY: U.S. Department of Energy.

ACTION: Notice.

SUMMARY: As required by the Privacy Act of 1974, 5 U.S.C. 552a, and the Office of Management and Budget (OMB) Circular A–130, the Department of Energy including the National Nuclear Security Agency (NNSA) (hereinafter referred to collectively as “DOE” or “the Department”) is publishing its compilation of Privacy Act Systems of Records. This notice provides an accurate and complete text of the agency’s systems of records, and adopts many of the recommendations that were made to DOE in comments that were submitted concerning proposed amendments to the compilation published by DOE on April 2, 2008.

DATES: The compilation of Privacy Act Systems of Records is effective January 9, 2009. The proposed new system of records will be open for comments until February 18, 2009. A final notice will be published addressing any comments received and adopting the notice.

ADDITIONAL INFORMATION:

SUPPLEMENTARY INFORMATION:

I. Background

DOE published a notice of its proposed compilation of its Privacy Act systems of records on April 2, 2008, at 73 FR 18044. The notice provided an accurate and complete text for the sixty-two systems of records established by DOE under the Privacy Act. Each system notice provided a description of the system of records, identified the purpose and authority for collecting and maintaining the information, reflected administrative changes that had been made, identified the appropriate DOE locations, and incorporated all routine uses. In addition, the notice proposed amendments to three existing systems of records, added a new routine use to all systems of records, established a new system of records, and deleted a system of records.

In the April 2, 2008 Federal Register Notice, DOE provided a date of April 2, 2008 for the public to comment on the proposed amendments to the Privacy Act compilation. However, on April 9, 2008 at 73 FR 19198, DOE published a notice correcting the comment date to May 9, 2008, effectively providing a 37-day period for the public to comment on the proposed amendments. The Department received numerous internal comments and no public comments. An analysis of the comments and the response by the DOE are provided in this notice.

II. Discussion of Comments

Comment: The Department received a comment stating that the DOE Headquarters, Washington, DC System Location for new system DOE–60 General Correspondence Files, should not be specific to Forestal Building, and should be changed to the broader U.S. Department of Energy. Headquarters, 1000 Independence Avenue, SW., Washington, DC 20585 to provide broader coverage.

Response: The comments are accurate. The text has been revised accordingly with this notice.

Comment: The Department received several comments related to the Correlations section of the proposed Compilation. One commenter stated that, pursuant to an Office of Science (SC) restructure since the last publication of the Privacy Act Compilation, Field Site Offices may no longer be offices under the Field Location Office organization, but in all instances the Field Site Offices and their M&O Laboratories do maintain records under Field Location Office jurisdiction. Accordingly, in the Correlations section, the title “Correlation of DOE Field Locations and Their Offices” should be changed to “Correlation of DOE Field Locations and Field Site Offices, M&O Laboratories, and Other Offices Maintaining Records under Field Location Jurisdiction.” That commenter also stated that with respect to the offices that constitute the SC Integrated Support Center (Chicago and Oak Ridge), some information is outdated or inconsistent with the SC Integrated Support Center Service Provider Matrix under which they operate. Other commenters suggested additional updates to the Correlation section and provided supplemental information for updating that section.

Response: The comments are accurate. The text has been revised accordingly with this notice.

Comment: The Department received several comments related to System Locations in the proposed Compilation. One commenter stated that Field System Locations in all Field portions of Privacy Act Systems should be the location having jurisdiction over records in the System, i.e., the location where the jurisdictional System Manager and cognizant Privacy Act Officer reside, not necessarily the physical location of the records. This is especially necessary in the 31 Systems of Records that provide the System Manager for the field portion of the System is the Manager (or Field subject matter Manager) of the System Location listed (DOE–1, 3, 5, 8, 13, 14, 16, 26, 28, 31, 33, 34, 35, 38, 41, 43, 44, 45, 46, 48, 50, 51, 52, 55, 56, 60, 63, 75, 77, 81, and 84). Field Locations (the DOE Field Locations listed in the “Correlations” section) should be listed accordingly as the only System Locations for their respective portions of the system, and any correlating Field Site Offices, M&O laboratories, and other offices maintaining records for the Field Location should be removed as System Locations, because they fall under the umbrella of the Field Location and would be listed as such under that Field Location in the Correlations section. Notification and Records Access provisions of those Systems are consistent with this revision, because they direct public and routine users to submit their requests to the Privacy Act Officer at the respective System Location listed. Also, if Field Site Offices, M&O laboratories, and other offices maintaining records for Field Locations were listed as System Locations, the public would be misdirected to submit their requests to locations where no Privacy Act Officer exists. Other commenters requested updates to specific System Locations and provided updated supplemental information for updating System Locations.

Response: The Privacy Act of 1974, 5 U.S.C. 552a Section (e)(4)(A) requires agencies to publish the name of the offices that constitute the system and the location where the records are being maintained. On July 9, 1975 at 40 FR 28948, the Office of
Management and Budget (OMB) published guidance to agencies implementing the Privacy Act. With respect to section (e)(4)(A), the OMB guidance stated “agencies will specify each city/town and site at which the system of records is located.” This includes the locations where records have been retired and sent to record centers. As currently structured the “Correlation Section” provides the public and routine users with the additional information necessary to determine which Field Location has jurisdiction over the records maintained for and by its correlating Field Site Offices, M&O and Laboratory sites. To determine the appropriate Privacy Act Officer for these locations, the additional information included in the “Correlation Section” and the updated language in the “Notification Procedures” directs the reader to the appropriate site. Although, the requester made a good point, the agency however, is correct providing a listing in the individual notices of all the field locations where records are being maintained. The various system managers for the systems of records were contacted and it was determined that this is consistent with the Privacy Act and the guidance provided by OMB. Therefore, the comment is not being adopted.

**Comment:** The Department received a comment stating that in DOE–5, Personnel Records of Former Contractor Employees, in the Purpose section, “with” should be added to the last line to now read “associated with their employment.”

**Response:** The comment is accurate. The text has been revised accordingly with this notice.

**Comment:** The Department received a comment stating that in the Categories of Individuals Covered section of DOE–11, Emergency Operations Notification Call List, “in DOE–11” should be added to the parenthetical to read (“hereinafter referred to in DOE–11 collectively as “DOE””). The commenter stated that without this change, from that point forward in the Compilation, the term “DOE” would mean DOE and NNSA.

**Response:** The comment is inaccurate. The text is not being revised because NNSA is a part of DOE.

**Comment:** The Department received a comment stating that, in spite of the fact that the Categories of Individuals Covered section under DOE–14, Report of Compensation includes DOE employees, the Purpose section only refers to reasonableness of compensation paid to top contractor personnel. If the full scope of data is compensation data on Contractor Key Personnel, DOE employees should not be mentioned in the Categories section. The commenter also stated that “up to $100,000” should be “exceeding $100,000.00.” Based upon current salary information.

**Response:** DOE agrees that the Categories of Individuals section should be revised to include only contractor employees, and the text of that section has been revised accordingly with this notice. DOE also agrees that the Categories of Records section should reflect the appropriate salary dollar threshold. However, based on unique provisions in DOE’s contracts with its contractors, contractual salary dollar thresholds may differ. Therefore, DOE has revised with this notice the text of the Categories of Records section to replace “current salary up to $100,000” with “current salary meeting the threshold level for reporting as specified in the respective contract.”

**Comment:** The Department received a comment stating that the new DOE–60 General Correspondence Files listing is correct providing a listing in the System Locations. For records maintained by the Laboratory, Site or Area Office, the request should be directed to the Privacy Act Officer that has jurisdiction over that site.

**Response:** The system manager(s) section of the notice informs the public of the physical address of the manager of the record. This is in conjunction with the “System Location” section (See comment on “System Locations.”) It is inaccurate to say that these field managers do not have responsibility for these records. As managers of these records they are responsible for the records and must follow the rules set by the Department for collecting, maintaining, safeguarding and storing the records. By removing the field system managers from the notice would be inconsistent with OMB’s guidance. Therefore, this portion of the comment will not be adopted.

The Privacy Act does not preclude individuals from submitting requests to those offices where records are maintained. If requests have been misdirected, the Department’s regulation implementing the Privacy Act (Title 10 Code of Federal Regulations Section 1008) provides procedures how to process misdirected requests. We have considered the comment and the “Notification Procedures” section will be revised to instruct individuals to submit Privacy Act requests for these records to the Headquarters Privacy Act Officer.

**Comment:** The Department received a comment stating that if the address of the System Location were included in
the Correlation list, it would not have to be repeated each time the System Location is identified in the System.

Response: DOE believes that although there may be some efficiency in the suggested change, such a change would only be applicable to certain locations and would cause potential requesters to take an extra step to locate the information needed to submit a request. Also, not repeating the system locations within the individual notices would not be consistent with OMB’s guidance (see comment on “System Locations.”) Therefore, the comment is not being adopted and the text is not being revised.

Comment: The Department received a comment stating that because “Purpose” sections throughout the Compilation provide clarification or add to the “Categories of Records in the System” sections, the commenter suggests adding language to the beginning of each Purpose section to tie the two sections, e.g. “For those records described in Categories in the System, such records are maintained. * * *” Response: DOE agrees with this suggested administrative change. The text has been revised accordingly with this notice.

Comment: The Department received a comment stating that in all Systems involving records maintained in the Field, it would be clearer to the public if there was a revision to the “Notification Procedures” boilerplate sentence beginning “For the records maintained. * * *” to “For records maintained by the M&O Laboratory or Field Site Office, the request should be directed to the Privacy Act Officer at the System Location listed as having jurisdiction over that site—see the Correlation of DOE Field Locations and Field Site Offices, M&O Laboratories, and Other Offices Maintaining Records under Field Location Jurisdiction at the beginning of this Compilation of Systems of Records.”

Response: DOE agrees with this comment with two minor revisions. (1) Consistent with this commenter’s previous comment regarding the organization within the Office of Science, such requests should be directed to the Privacy Act Officer at the System Location listed as having jurisdiction over “the records” for that site; and (2) better direction to requesters can be provided by stating “* * * as listed in the Correlation * * *” rather than “see the Correlation * * *”. The text has been revised accordingly with this notice.

Comment: The Department received a comment stating that the “Retrievability” sections in some of the Systems specify that the records in the System are those retrieved by name or other personal identifier (e.g., SSN, badge number). Other Systems indicate that the record MAY BE retrieved by name or personal identifier. The commenter stated that this language is contrary to the Privacy Act and its implementing regulations (10 CFR 1008), which define “System of Records” as “a group of any records under the control of any agency from which information is retrieved by the name of the individual or some identifying number, symbol, or other identifying particular assigned to the individual.” The commenter stated that the Retrievability sections should be amended to reflect that records in the system ARE retrieved by name and/or whatever other personal identifier(s) are applicable to the system.

Response: The comment is accurate. The text has been revised accordingly with this notice.

Comment: The Department received a comment stating that in the Purpose section of DOE–38 Occupational and Industrial Accident Records, “contract” should be “contractor.”

Response: The comment is accurate. The text has been revised accordingly with this notice.

Comment: The Department received a comment stating that in DOE–24 Land Records System, something is missing in the first sentence of the “Purpose” section, before “grants, licenses.”

Response: After consultation with the Privacy Act Officer and Counsel at one of the System Locations for this system, DOE has determined that there is in fact text missing from the language in the Purpose section of this system. The missing text in the “Purpose” section has been added accordingly with this notice.

Comment: The Department received a comment stating that since “Department of Energy” has been defined in the Introduction as either “DOE” or “Department” there is no need to add the parenthetical in subsequent usage (e.g., DOE–9, Categories of Individuals).

Response: DOE agrees with the suggested administrative changes. The text has been revised throughout the Compilation accordingly with this notice.

III. Proposed New System of Records

DOE–17 DOE Alert System

The Department proposes to establish a new system of records entitled DOE–17 “DOE Alert System.” The Roam Secure Alert Network (RSAN) software is the prime component of the DOE Alert System. It provides the capability to send text messages to text-capable devices of DOE Headquarters employees in the event of an emergency. It is one of numerous communication systems that allow quick, effective, and efficient information dissemination. It is not the primary notification system for an event, however, it can be used to provide additional information following an even occurrence.

The information in the system will pertain to DOE employees and contractor employees. It is a voluntary system that employees sign up to be alerted in case of an event or emergency. The information will be used by the Department to contact only the registered users of the system in case of an event.

The records will be stored as paper records and electronic media. Information is retrieved by the name of the individual. The authorities for the DOE Alert System are Title 42 United States Code (U.S.C.) Section 7101 et seq.; and 50 U.S.C. 2401 et seq.

The Department does not believe the maintenance of this system will have any substantial effect on privacy and other rights of individuals, particularly since the participation in the program is strictly voluntary and the information is provided by the employee. The system is necessary to efficiently administer the program.

IV. Comment Procedure

As provided by 5 U.S.C. 552a(e)(11) interested persons are invited to submit written data, views or comments related to the proposed new system of records to the U.S. Department of Energy, Office of Information Resources, MA–90, 1000 Independence Avenue, SW., Washington, DC 20585. “Comments” should be written on the outside of the envelope and on the documents submitted to DOE with the designation “Department of Energy Privacy Act Systems of Records Proposal.” The comments and all other relevant information will be considered by DOE before the proposed new system of records is adopted in its final form. A final notice will be published addressing any comments received and adopting the notice upon the expiration of the 40-day advance notice period for informing Congress and the Office of Management and Budget (OMB) of the proposed new system.

The Department is submitting to Congress the report on the new system as required by OMB Circular A–130 concurrently with publication of this Federal Register notice.
