

Mark Pitt is a Professor of Physics at Virginia Tech. He received his Ph.D. from Princeton in 1992 and a B.S. from Caltech in 1985. He was a Robert A Millikan research fellow in physics and then senior research fellow in physics at Caltech before joining the Virginia Tech faculty in 1997. His primary research interest is in fundamental symmetries, in particular the use of parity-violating electron scattering as a test of the standard model and as a probe of nucleon structure. A recipient of a NSF CAREER award, he is currently a member of the Qweak and MOLLER collaborations, and serves as chair of the Qweak Institutional Council and as MOLLER deputy spokesperson and chair of its Executive Board. He served on the Jefferson Lab User's Group Board of Directors in 2002 – 2004.
