

Robert V. F. Janssens is the Edward G. Bilpuch Professor of Physics within the Department of Physics and Astronomy at the University of North Carolina at Chapel Hill. He received his B.S. from the University of Louvain (Belgium) in 1973. In 1978, he earned his Ph.D. from the same university. From 1978 to 1980, he was a research associate at the KVI, University of Groningen, the Netherlands. In 1980 – 1981, he was Physics Professor at the Military Academy (ERC) in Brussels, Belgium. He was a member of the Physics Division at Argonne National Laboratory as an Assistant Scientist (1981 - 1984), Scientist (1984 - 1993), and Senior Scientist (1994 - 2017). He was Program Head of the Low-Energy group from 1994 to 2000 and Scientific Director of the ATLAS facility from 2000 until 2011. From 2000 until 2006, he was also the Associate Director of the Physics Division, becoming its Interim Director in 2007. He was appointed Division Director in 2008, a position he held until early in 2017. He has been Adjunct Professor in the Department of Physics and Astronomy at Michigan State University since 2001 and a Guest Professor in the Department of Physics at the University of Notre Dame since 2004. He has supervised eleven Ph.D. theses. He was Divisional Associate Editor for Physical Review Letters (1994 – 2000). Janssens studies nuclear structure at the limits of stability, especially in high-Z and in neutron-rich nuclei. He is also interested in the impact of structure and reaction dynamics on nuclear astrophysics processes, and in the development of new instrumentation. He is a co-author of more than 650 publications in refereed journals (h-index*: 59), and has given more than 120 invited talks at conferences and workshops. He has served the national and international nuclear science communities by participating in numerous advisory committees and review panels.
