

**Rebecca Surman** is a Professor of Physics at the University of Notre Dame. She received her Ph.D. in Physics from the University of North Carolina – Chapel Hill in 1998, an M.S. from Michigan State University in 1995, and a B.A. from the State University of New York at Geneseo in 1993. Professor Surman is a theoretical nuclear astrophysicist with interests in the astrophysical origins of the heavy elements, the neutrino and nuclear physics of supernovae and compact object mergers, and the properties of nuclei far from stability. She has co-authored 71 articles in peer-reviewed journals and given over 100 invited talks and lectures. She is a fellow of the American Physical Society (2016) and has served on the Executive board of the Facility for Rare Isotope Beams Theory Alliance (2016-2019), and the APS Division of Nuclear Physics Executive Committee (2017-2019).
