

**Thomas Albrecht-Schoenzart** is the Gregory R. Choppin Chair in Chemistry at Florida State University and Director of the Center for Actinide Science & Technology, a Department of Energy, Energy Frontier Research Center that focuses on mitigating the environmental legacy of the Cold War. He is a Fellow of the Royal Society of Chemistry and the AAAS and winner of several American Chemical Society awards including the Glenn T. Seaborg Award for Nuclear Chemistry. His research interests center on the chemistry, physics, and materials science of radioactive elements, especially heavy elements like berkelium and californium. Professor Albrecht-Schoenzart received his Ph.D. in Chemistry from Northwestern University in 1997 and was a post-doctoral fellow at the University of Illinois in 1998.
