

Justin Walensky is a Professor and Chair of Chemistry at the University of Missouri, Columbia (Mizzou). His research involves the coordination chemistry, bonding, and reactivity of actinide complexes, particularly thorium, uranium, and neptunium. He has received major awards from the Department of Homeland Security (Nuclear Forensics Junior Faculty Award, 2011) and the Department of Energy (Early Career Award, 2015) for his research. He has been active in the ACS as Chair of the Nuclear Chemistry and Technology Division as well as a member of the AAAS. His research group has published nearly 100 peer reviewed papers on a variety of topics in inorganic chemistry. He received his Ph.D. in Chemistry from the University of California, Irvine in 2009, and was a postdoctoral fellow at Texas A&M University prior to joining the faculty at Mizzou in 2011.
