The DOE Webinar is scheduled to begin at 2:00 p.m. ET

- **Why is there no sound?**
  - This webinar is broadcast via your computer. You may need to turn your volume on or up as the sound for this webinar comes through your computer speakers.
    - We recommend using GOOGLE CHROME for this and other DOE SBIR webinars.
    - There is no dial-in number.

- **Will DOE provide access to the recorded webinar after the meeting?**
  - Yes, we will post the slides and the recorded webinar on the DOE SBIR/STTR web site.

- **Where can I find the FOA being discussed today?**
  - This link will take you to the FY 2020 Phase I Release 1 FOA:
    [https://science.osti.gov/sbir/Funding-Opportunities](https://science.osti.gov/sbir/Funding-Opportunities)

- **What if my question was not answered at today’s webinar?**
  - If you have a question about the grant application process, please send us an email at: sbir-sttr@science.doe.gov or call us at (301) 903-5707.
DOE’s
Small Business Innovation Research (SBIR) and Small Business Technology Transfer (STTR) Programs

Chris O’Gwin
DOE SBIR/STTR Programs Office

FY20 Phase I Release 1 Overview
August 19, 2019
Overview of Federal SBIR/STTR Programs
FEDERAL Extramural R&D

Extramural R&D ~$90B/year

federal government

SBIR/STTR ~$3.5B/year

small businesses

universities

businesses

federally funded laboratories
Program Goals

Small Business Innovation Research (SBIR)  *est. 1982*
- Stimulate technological innovation
- Use small business to meet Federal R&D needs
- Foster and encourage participation by women and socially and economically disadvantaged persons in technological innovation
- Increase private-sector commercialization of innovations derived from Federal R&D

Small Business Technology Transfer (STTR)  *est. 1992*
- Stimulate and foster scientific and technological innovation through cooperative research and development carried out between small business concerns and research institutions
- Foster technology transfer between small business concerns and research institutions

*SBIR and STTR were reauthorized on December 23, 2016 (P.L. 114-840) through September 30, 2022*
Major Differences between SBIR & STTR

- **STTR:** Requires collaboration with a Research Institution
  - Research Institution
    - College, University, Federal R&D Laboratory, other non-profit research organization
- **Principal Investigator primary employment**
  - SBIR: employed by the small business
  - STTR: employed by the small business OR research institution
- **Percentage of R/R&D conducted by the small business**
  - SBIR
    - Phase I: minimum 2/3 by small business
    - Phase II: minimum 1/2 by small business
  - STTR:
    - Phase I & II: minimum 40% by small business; minimum 30% by research institution
  - Subcontracting is permitted provided the level of effort requirements above are met
SBIR & STTR Funding Levels

- Agencies allocate a percentage of their extramural R/R&D budgets for the SBIR & STTR programs
  - SBIR: 3.2% (FY 2019), for agencies with >$100M in extramural R/R&D
  - STTR: 0.45% (FY 2019), for agencies with >$1B in extramural R/R&D
- Congress has increased the allocation percentages since the programs were initiated

*source: SBIR.gov, 8/22/2016
Estimated SBIR/STTR Budgets by Agency, FY 2018

AGENCIES WITH SBIR & STTR PROGRAMS

*DHHS also issues contracts

~ $3.6B in FY 2018 across all agencies
Small Business Eligibility for SBIR & STTR

• For-profit U.S. business
• 500 employees or fewer, including affiliates
• Ownership *(applies to all agencies)*
  – Be a concern which is more than 50% directly owned and controlled by one or more individuals (who are citizens or permanent resident aliens of the United States), other small business concerns (each of which is more than 50% directly owned and controlled by individuals who are citizens or permanent resident aliens of the United States), or any combination of these
  – Joint ventures where the entities meet the requirements above
• Portfolio Companies *(some agencies)*
  – Be a concern which is more than 50% owned by multiple venture capital operating companies, hedge funds, private equity firms, or any combination of these. No single venture capital operating company, hedge fund, or private equity firm may own more than 50% of the concern.
• Performance of R&D
  – All R&D must be performed in the United States
3 Phases

**Phase I: Feasibility, Proof of Concept**
- Award Amount: $168,087 (guideline), $252,131 (max.)
- Project Duration: 6-12 months

**Phase II: Continue R/R&D for Prototypes or Processes**
- Award Amount: $1,120,586 (guideline), $1,680,879 (max.)
- Project Duration: 2 years
- Additional Phase II awards can be made

**Phase III: Commercialization**
- Federal or Private Funding (non-SBIR/STTR funds)
- No dollar or time limits
SBIR and STTR Awards

- Critical Early Stage R/R&D funding
  - The SBIR & STTR programs provide funding for innovative, early stage research
  - SBIR & STTR awards provide credibility when seeking investors or partners
- SBIR/STTR awards are executed as grants or contracts
  - No repayment
  - No dilution of company equity
  - No cost sharing is required for Phases I and II. Cost sharing may not be used as an evaluation criteria.
Intellectual Property

- **Patent rights**
  - Small business concerns normally retain the principal worldwide patent rights to any invention developed with Government support

- **Government Use**
  - The Federal Government receives a royalty-free license for Federal Government use

http://www.uspto.gov/
Data Protection

• Protection Period
  – Data generated from your R/R&D is protected from public disclosure for a minimum of **20 years** from the start of your award. *New policy change implemented in 2019*

• Government Use
  – The Government retains a royalty-free license for Government use of any technical data delivered under an SBIR award, whether patented or not
DOE SBIR & STTR Programs: Technology Areas
**U. S. Department of Energy Mission**

- **DOE’s Mission** is to ensure America's security and prosperity by addressing its energy, environmental, and nuclear challenges through transformative science and technology solutions.

  - **Goal 1:** Catalyze the timely, material, and efficient transformation of the nation's energy system and secure **U.S. leadership in energy technologies.**

  - **Goal 2:** Maintain a **vibrant U.S. effort in science and engineering** as a cornerstone of our economic prosperity, with clear leadership in strategic areas.

  - **Goal 3:** Enhance **nuclear security** through defense, nonproliferation, and environmental efforts.
DOE SBIR and STTR Programs
Operational Process

DOE Program Office
- Develop Topics
- Identify Reviewers (Scientific Peer Review)
- Recommend Awardees
- Manage Projects

DOE Chicago Office
- Negotiate Grants
- Issue New and Continuation Awards
- Grant Closeout

DOE SBIR/STTR Programs Office
- Develop Funding Opportunity Announcements
- Administer Review and Selection Process
- Ensure Compliance with SBIR/STTR Legislation
- Conduct Outreach

Technical Expertise Leveraged Throughout DOE

Single Administrative Office for Applicants

Single Grants Office for Awardees
Information Available at DOE Program Office Websites

- Mission
- Funding Priorities and Announcements (non-SBIR)
- Technical Reference Data and Reports
- Conference Proceedings
- Contact Information
DOE Program Offices supporting

Goal 1: Energy Technologies

- Office of Cybersecurity, Energy Security and Emergency Response
- Office of Electricity
- Office of Energy Efficiency and Renewable Energy
- Office of Fossil Energy
- Office of Nuclear Energy

R&D Topic Areas
- Clean Coal Technologies
- Advanced Turbine Technology
- Oil and Gas Technologies
- Advanced Materials and Technologies for Nuclear Energy
- Smart Grid Technologies
- Cyber Security
- Energy Storage
- Bio-energy & Biofuels
- Hydrogen & Fuel Cells
- Solar Power
- Water Power
- Wind Energy
- Advanced Manufacturing
- Efficient Buildings & Vehicles
DOE Program Offices Supporting
Goal 2: Science and Engineering Leadership

- Advanced Scientific Computing Research
- Basic Energy Sciences
- Biological and Environmental Research
- Fusion Energy Sciences
- High Energy Physics
- Nuclear Physics

R&D Topic Areas
- Advanced Detectors
- Accelerator technology
- RF Components and Systems
- Data Acquisition, Processing and Analysis
- Fusion Energy Systems
- High Performance Computing & Networking
- Quantum Information Sciences
- Modeling and Simulation
- Atmospheric Measurement Technology
- Genomic Science and Related Biotechnologies
- Advanced Sources: neutron, x-ray, electron
DOE Program Offices Supporting

Goal 3: Nuclear Security

- Office of Defense Nuclear Nonproliferation
- Office of Environmental Management

R&D Topic Areas
- Novel Radiation Monitoring Concepts
- In Situ Remediation
- Facility Deactivation and Decommissioning
- Remote Sensing
- Global Nuclear Safeguards R&D
- Nuclear Detonation Detection
DOE SBIR & STTR Programs: Application & Award Process
Application & Award Timelines

- **Phase I**
  - Issue Topics
  - FOA: Funding Opportunity Announcement
  - Applications Due
  - LOI Due
  - Review & Selection
  - Award Notification
  - Start of Budget Period
  - Budget Period: 6-12 months

- **Phase II**
  - Issue FOA
  - Applications Due
  - Review & Selection
  - Award Notification
  - Start of Budget Period
  - Maximum Award Amount: $200,000
  - Budget Period: up to 24 months

**FOA**
- Funding Opportunity Announcement

**LOI**
- Letter of Intent

**Maximum Award Amount:**
- Phase I: $200,000
- Phase II: $1,100,000 or $1,600,000 (varies by topic)

*Phase I & II Award Amounts have been increased in FY 2019*
Second Phase II Awards (Maximum Award Amount: $1,100,000)

- Phase IIA: For projects requiring more time and funding than available with a single Phase II award to complete prototype or process development
- Phase IIB: For projects that have successfully completed prototype or process development and require additional R&D funding to transition an innovation towards commercialization

Third Phase II Awards (pilot program started in FY 2019)

- Requires 1:1 investor matching funds
FY 2020 SBIR/STTR Phase I Funding Opportunity Announcements

Phase I Release 1
- Office of Advanced Scientific Computing Research (ASCR)
- Office of Basic Energy Sciences (BES)
- Office of Biological and Environmental Research (BER)
- Office of Nuclear Physics (NP)

Phase I Release 2
- Office of Defense Nuclear Nonproliferation (NA)
- Office of Electricity (OE)
- Office of Energy Efficiency and Renewable Energy (EERE)
- Office of Fossil Energy (FE)
- Office of Fusion Energy Sciences (FES)
- Office of High Energy Physics (HEP)
- Office of Nuclear Energy (NE)

Assistance for the Application Process

- We have an online learning system to assist new applicants:
  - [https://science.osti.gov/SBIRLearning](https://science.osti.gov/SBIRLearning)
- Additional resources can be found on our website:
  - [https://science.osti.gov/sbir/Applicant-Resources](https://science.osti.gov/sbir/Applicant-Resources)
- Phase 0 Application Assistance Program:
  - Created to assist first-time applicants from under-represented groups (socially and economically disadvantaged small businesses, women-owned small businesses, and small businesses from under-represented states) prepare high quality applications
  - Any first-time applicant is eligible to apply for assistance
  - [http://www.dawnbreaker.com/doephase0/](http://www.dawnbreaker.com/doephase0/)
- Services
  - Letter of Intent (LOI) writing assistance
  - Phase I Proposal Preparation, Review and Registration Assistance
  - Market Research Assistance
  - Small Business Development Training, Mentoring and Registrations
  - Technology Advice and Consultation
  - Intellectual Property Consultation
  - Indirect Rates and Financials
Topics

• Topics Document
  – DOE primarily uses focused topics
  – Issued 4 weeks prior to the FOA

• Communication with DOE program managers
  – Open communication permitted about topic scope

• Webinar
  – DOE program managers discuss their topics
  – Applicants submit questions in advance or during the webinar
  – Webinars are recorded and available at our website
Example Topic

- **Topic & Subtopic**
  - You must specify the topic and subtopic in your letter of intent and application
- **Topic Header**
  - Lists the maximum award amounts for Phase I & Phase II and whether SBIR & STTR applications are accepted
- **Program Manager**
  - Each subtopic lists the responsible DOE program manager
- **Other Subtopic**
- **References**
Technology Transfer Opportunities (TTOs)

• An opportunity to transfer inventions made by a DOE National Lab or university to your small business for commercialization
• Awardees receive
  – an SBIR/STTR grant and
  – an option to license the technology
• Please review TTO information section at the beginning of the topics document if you plan to submit an application to a TTO.
Example Technology Transfer Opportunity Topic

- Technology Transfer Opportunity
  - The topic or subtopic will be clearly labeled
- Research Organization
  - The DOE National Lab or university responsible for the TTO is listed along with contact information and other references
  - Please contact the Lab or university to obtain information about the TTO
- DOE Program Manager

---

25. TECHNOLOGY TRANSFER OPPORTUNITIES: BASIC ENERGY SCIENCES

<table>
<thead>
<tr>
<th>Maximum Phase I Award Amount: $200,000</th>
<th>Maximum Phase II Award Amount: $1,100,000</th>
</tr>
</thead>
<tbody>
<tr>
<td>Accepting SBIR Applications: YES</td>
<td>Accepting STTR Applications: YES</td>
</tr>
</tbody>
</table>

Applicants to TECHNOLOGY TRANSFER OPPORTUNITIES (TTO) should review the section describing these opportunities on page 7 of this document prior to submitting applications.

b. Technology Transfer Opportunity: NBS High Performance Superconducting Undulator

Argonne National Laboratory (ANL) researchers have developed a novel superconducting (SC) magnetic device called a superconducting undulator (SCU). Such a device, installed in the storage ring or undulator line of existing synchrotron or free-electron laser light sources, significantly enhances their performance. SCUs deliver higher magnetic fields at smaller undulator periods, resulting in performance superior to that of permanent magnet undulators. An SCU is a cryogenic device that consists of the cryostat; an SC magnet with a sign-alternating magnetic field; and sets of mechanical, electrical, and electronic control systems that permit this device to be operated as a component of large light sources. The SCU cryogenic system maintains the temperature of the undulator magnet close to that of liquid helium. A specially designed and precisely fabricated undulator magnet delivers the high-quality magnetic field that is critical for optimizing the performance of advanced light source facilities. Special auxiliary systems permit an SCU to be seamlessly incorporated into any type of light source. In addition to the SCU, ANL researchers have developed special tools to characterize an SCU prior to installation in the light source. Several SCUs, built at ANL, have demonstrated remarkable operational performance and a high level of reliability. ANL is looking for the industrial partner with the proven record of designing, building and delivering to customers SC magnets and cryogenic equipment, such as cryostats, to house these magnets. Industrially produced SCUs would find their way to numerous light sources around the world and significantly advance the performance of these sources.

Questions – Contact: Eliane Lessner, eliane.lessner@science.doe.gov
Funding Opportunity Announcement (FOA)

- **FOA**
  - Available at the [DOE SBIR website](https://www.energy.gov/sbir) or [Grants.gov](https://www.grants.gov) and includes information on
    - Anticipated number of awards and funding available
    - Eligibility
    - Application Requirements
    - Review Criteria
    - Award Administration
  - Open for approximately 9 weeks

- **Communications with DOE program managers**
  - Open communication permitted to clarify the scope of the topic and subtopic prior to submitting an application
Commercialization

• DOE topics are drafted by program managers who are aware of the technology roadblocks but may not be aware of the commercialization challenges
• Small business applications are expected to address the commercialization challenges and ensure that there is a profitable business opportunity
  – Phase I & II Applications must include Commercialization Plans
  – Commercialization Plans accommodate long commercialization timeframes: emphasis on first 10 years of commercialization beginning with first sale
  – Ability to address follow-on markets can also be included in your commercialization plan
• DOE performs follow-up surveys to track commercialization outcomes of its SBIR/STTR awards
Letters of Intent (LOI)

- **Requirement**
  - You must submit an LOI by the due date to be eligible to submit an application

- **Primary purpose**
  - begin reviewer assignment to reduce award selection time
  - due 3 weeks after FOA is issued

- **Secondary purpose**
  - provide email notification to applicants who appear to be non-responsive; you may submit an application if you receive this notification
  - Applicants whose LOI appears responsive will NOT receive a notification

- **Limits**
  - Small businesses may submit only 10 letters of intent (and 10 applications) per solicitation

**Content of LOI**

- **Title**
- **Topic and Subtopic**
- **Abstract (<500 words)**
  - Provide sufficient technical detail to enable reviewer assignment
  - Non-proprietary
- **List of Collaborators**
- **Small Business Information**
  - Name, address
  - Business Official and contact information
  - Principal Investigator
Letter of Intent (LOI) Submission

• Submit LOI online directly to the DOE Portfolio Analysis and Management System (PAMS) website:
  https://pamspublic.science.energy.gov/
  – Select “Create New PAMS Account” (if you do not have an account)
  – Submit your abstract as a PDF file
  – Utilize the LOI instructions available at the DOE website to ensure that you submit all the required information
  – For additional details on the LOI submission process, see the FOA
ABC LLC will develop a new class of low cost battery separator materials for lithium ion batteries. It is anticipated that the cost of this separator will be 70% lower than separator materials available today and will be a critical factor in reaching the $150/kWh cost target specified in topic 4b for lithium ion batteries for electric vehicle applications.

These separators will utilize a new optically-activated method of producing pores in nano-structured polyolefin films. This optical pore formation method results in a 10x increase in the speed of creating porous films. During Phase I, ABC LLC will (1) develop the compositions and methodology for formulating the dense nano-structured polyolefin films and (2) carry out preliminary feasibility studies to characterize the appropriate optical intensities and wavelengths to achieve uniform, high speed, pore formation. It is anticipated that multiple iterations will be required to optimize the composition and nanostructure of the precursor films to achieve the desired porosity and process speeds. All processing work will be carried out at ABC LLC but polymer characterization will leverage capabilities of the Polymer Lab at State University to evaluate the structure, porosity, tortuosity, and thermal properties of the polymer films. In addition we will be collaborating with Lion Battery Inc. who will do preliminary battery testing of our separator materials to identify any manufacturing or performance issues of the separators.
Applications must be submitted through **Grants.gov**

Registration at Grants.gov is a 3 step process:

1. Obtain a DUNS number
2. Complete a SAM registration.
   - Must be updated annually
3. Complete Grants.gov registration
   - Start this process as early as possible!

See the Grants.gov website for instructions.

Small Business Administration (SBA) company registry:
- Small businesses must register at the SBA company registry ([http://www.sbir.gov/registration](http://www.sbir.gov/registration)) and submit a copy of their registration with their grants.gov application.
Completing a Grants.gov Application

- **Workspace**
  - Online application completion and submission
  - Online tutorials are available
  - [https://www.grants.gov/applicants/workspace-overview.html](https://www.grants.gov/applicants/workspace-overview.html)
Completing an Application

- Important documents to assist you with completing the application package
  - Topics Document, Funding Opportunity Announcement, & Instructions are available at the DOE SBIR/STTR website
  - Online tutorials are available at http://www.doesbirlearning.com/
Important Elements of Your Application

• Project Narrative
  – Page and word limits
    • Phase I: 15 pages, 7,500 words
    • Phase II: 20 pages, 10,000 words
• Budget & Budget Justification
• Key Personnel
• Commercialization Plans
  – Phase I commercialization plan
    • an example can be found here at https://science.osti.gov/sbir/Applicant-Resources/Grant-Application
  – Phase II commercialization plan
• SBIR/STTR Information form
• Data Management Plan
Data Management Plan

• Purpose – Disseminate, as widely as possible, data generated with public funding

• Requirement – All SBIR and STTR applications must select one of the two Data Management Plan (DMP) options below:
  – Option 1
    • The Option 1 DMP is: “It is anticipated that all generated digital data will be protected as SBIR/STTR data and therefore will not be publicly shared during the applicable SBIR/STTR data protection period.” If any data generated under this award are published, an effort will be made to also release any related digital data that is not protected SBIR/STTR data.”
    • Please note that if you do not include a DMP with your application, Option 1 for the DMP will be assumed for your application. However, if you plan to publicly disclose generated digital data, you must provide a DMP under Option 2.
  – Option 2
    • If you plan to publicly disclose technical data during the data protection period or, for data not expected to be asserted as protected SBIR/STTR rights data, please submit a DMP. Use the DMP requirements outlined in the FOA.
Top Application Errors

• Serious Errors (Applications Ineligible for Review or Administratively Declined)
  – *Failed to update SAM registration early—unable to submit application to Grants.gov by deadline*
  – *Failed to submit a Letter of Intent (LOI) by the LOI deadline*
    • A LOI needs to be submitted by the LOI deadline each application.
      – Please note: The project title and topic/subtopic designation included in the LOI need to match the application.
  – *Failed to accurately calculate level of effort (for SBIR and/or STTR)*
    • Use Level-of-Effort worksheet to assist you with the calculation
  – *Failed to meet Principal Investigator hours requirement*
    • Principal Investigator must devote at least 3 hours per week on average for the duration during Phase I project
      – Example: 12 month project: at least 156 hours (52 weeks x 3 hours/week). List the hours explicitly in your budget justification

• Other Errors (may limit funding eligibility or delay award processing, if recommended for award)
  – *Failed to properly mark proprietary data*
    • See FOA for instructions
  – *Failed to complete budget form(s) correctly*
    • Amounts in the budget form should be rounded to the nearest dollar and only include funds requested for the grant excluding any outside source funding.
    • Amounts listed on the budget form should match the amounts listed on the budget justification (unless explicitly labeled as other funding from outside sources).
    • Include a completed subaward budget form for each subaward included in the application. (Subaward budget form(s) total should match the amount for subaward listed in the small business budget form.)
  – *Failed to include Letter(s) of Commitment*
    • Submit a Letter of Commitment for each Consultant and Subaward in Field 12 of the Research & Related: Other Project Information Form
SBIR vs. STTR

- DOE uses the same topics for SBIR & STTR
  - All topics accept SBIR applications; some topics may not accept STTR applications so please check the topic header prior to submission

- Applicants can apply to either or both SBIR & STTR programs with a single application
  - If you apply to both programs, you must meet the requirements for both
Review and Selection of Applications

- DOE primarily uses external peer review to evaluate your applications
  - Typically at least 3 technical reviewers
  - 1 reviewer for the Phase II commercialization plan

- Review Criteria (equally weighted)
  - Strength of the Scientific/Technical Approach
  - Ability to Carry Out the Project
  - Impact

- Selection
  - DOE ranks the most meritorious applications—award selections are made based on available funding

- You will be notified of the decision on your application within 90 days of the application deadline
  - Reviewer comments will be made available to you through PAMS. Use this feedback constructively to improve future applications
• Reviewers agree that (1) they will keep application information confidential and (2) they do not have a conflict of interest in reviewing the application.
Phase I Application & Award Statistics for FY 2019

- Phase I
  - 1,600 applications
  - 417 awards
Phase II Application & Award Statistics for FY 2019

- **Phase II**
  - 431 applications
  - 200 awards

- **Phase IIA**
  - 29 applications
  - 13 awards

- **Phase IIB**
  - 44 applications
  - 22 awards

- **Phase II**
  - 36% Awarded
  - 46% Recommended for Funding–Not Awarded
  - 17% Not recommended for Funding
  - 1% Declined Without Review

- **Phase IIA**
  - 39% Awarded
  - 36% Recommended for Funding–Not Awarded
  - 25% Not recommended for Funding

- **Phase IIB**
  - 41% Awarded
  - 50% Recommended for Funding–Not Awarded
  - 9% Not recommended for Funding
Commercialization Assistance

- DOE Commercialization Assistance
  - Phase I assistance
    - Assistance with development of Phase II commercialization plans
    - Or, Industry-specific business consultant
  - Phase II assistance
    - Flexible offerings to meet a variety of commercialization needs
    - Or, Industry-specific business consultant
  - Vendor website: [http://www.larta.org/doecap](http://www.larta.org/doecap)

- Company-selected commercialization assistance vendor
  - Companies may select their own vendor(s) to provide commercialization assistance
  - Company must include this vendor(s) as a subcontractor or consultant in their Phase I or II application
  - Up to $6,500 for Phase I
Phase I Principal Investigator Meeting

• Phase I Principal Investigators are expected to attend a two day DOE SBIR/STTR Principal Investigator Meeting held in the DC area
  – Release 1: June
  – Release 2: October

• Objectives
  – In-person meetings with DOE program managers and DOE Commercialization Assistance provider
  – Presentations relating to Phase II and Commercialization
  – Small business networking

• You may include the cost for the trip (registration, travel) in your Phase I budget

• Exceptions
  – If the DOE program office that funds your topic has a separate principal investigator meeting, you will be notified that your participation in the Phase I PI meeting is optional
DOE Office of Inspector General:
Fraud, Waste & Abuse
• **What types of fraud are found in the SBIR Program?**
  - Application Process
    - submitting a plagiarized proposal
    - providing false information regarding the company, the Principal Investigator (PI), or work to be performed
    - seeking funding for work that has already been completed
  - During Award
    - using award funds for personal use or for any use other than the proposed activities
    - submitting plagiarized reports or reports falsely claiming work has been completed
    - claiming results for an award that were funded by a different source
• **Which SBIR rules should you be particularly familiar with?**
  – Duplicate or overlapping proposals may not be submitted to multiple agencies without full disclosure to all agencies.
  – The company must meet SBA’s requirements for a small business, including being majority American owned and have 500 employees or fewer.
  – For SBIR: The PI’s primary employment must be with the company during the grant period. The PI may not be employed full time elsewhere.
  – For SBIR: For Phase I, a minimum of two thirds of the research effort must be performed by the grantee company; for Phase II, a minimum of one-half of the research effort must be performed by the grantee company. Work performed by a university research lab is NOT work completed by the grantee company.
  – University employees participating on an SBIR award should disclose their involvement to the university as well as their use of university facilities.
  – R&D must be performed in the United States.
What Happens If You Break the Rules?

If you commit fraud or other wrongdoing in applying for or carrying out an SBIR award, we will investigate.

We refer violations of civil or criminal law to the Department of Justice (DOJ). If DOJ prosecutes you for fraud or false statements, you may be sentenced to prison and required to pay full restitution. If DOJ pursues a civil action under the False Claims Act, you may have to pay treble damages and $11,000 for each false claim. In addition, DOE may terminate your awards and debar you from receiving grants or contracts from any federal agency.
Scientists Sentenced To Prison For Defrauding The Small Business Innovation Research Program

Tampa, Florida – U.S. District Judge Virginia Hernandez Covington has sentenced Mahmoud Aldissi (a/k/a Matt) and Anastassia Bogomolova (a/k/a Anastasia) for conspiracy to commit wire fraud, wire fraud, aggravated identity theft, and falsification of records. Aldissi was sentenced to 15 years in federal prison and Bogomolova was sentenced to a term of 13 years. As part of their sentences, the court entered a money judgment in the amount of $10.6 million, representing the proceeds of the crime, and ordered them to pay $10.6 million in restitution. Aldissi and Bogomolova were found guilty on March 20, 2015.

According to testimony and evidence presented during the month-long trial, through their two companies, Fractal Systems, Inc., and Smart Polymers Research Corp., Aldissi and Bogomolova fraudulently obtained approximately $10.5 million of small business research awards from the federal government. In order to be awarded contracts, they submitted proposals using the stolen identities of real people to create false endorsements of and for their proposed contracts. In the proposals, they also lied about their facilities, costs, the principal investigator on some of the contracts, and certifications in the proposals.

The Department of Energy’s Office of Inspector General (OIG) promotes the effective, efficient, and economical operation of DOE’s programs and operations through audits, inspections, investigations, and other reviews.

Within DOE OIG, the Office of Investigations is responsible for investigating any fraudulent acts involving DOE, its contractors or subcontractors, or any crime affecting the programs, operations, Government funds, or employees of those entities.
