

Patrick Gallagher

Graduate Institution: Stanford University

Graduate Discipline: Physics

Hometown: San Jose, CA

Relevant SC Research: Basic Energy Sciences

Research Interest:

I am primarily interested in the physics of correlated electron systems and the experimental techniques used to study these systems. In particular, my research focuses on low-temperature electronic transport measurements of systems with significant electron-electron interactions. I am also interested in ultracold atom experiments that study many-body physics.

About Me:

I graduated from Stanford in 2010 with a bachelor's degree in physics, and

began my PhD at Harvard later that year. In February 2012, I moved back to Stanford, where I will complete my PhD. After graduate school, I expect to stay involved in research, either in industry or in academia. I enjoy California sun and motorsports.
