

Alex Ryckman Mellnik

Graduate Institution: Cornell University

Graduate Discipline: Condensed Matter Physics

Hometown: Charlotte, NC

Relevant SC Research: Basic Energy Sciences

Research Interest:

I'm interested in magnetic systems, topological insulators, spin torque and the spin hall effect.

About Me:

I'm a fourth-year student in Dan Ralph's group at Cornell University. I'm currently studying topological insulators, particularly possible applications of their unusual properties. After I graduate I plan to look for a research or consulting position in a non-academic setting.

When I'm not in the lab I enjoy gardening, go, kiteboarding, ultimate frisbee, and reading.
